Infections And Inequalities The Modern Plagues Updated With A New Preface:

Pathologies of Power Paul Farmer, 2005 Pathologies of Power uses harrowing stories of life and death to argue that the promotion of social and economic rights of the poor is the most important human rights struggle of our times Colonial Pathology Begna Dugassa, 2025-02-02 This book critically examines the Oromo people's experiences under Ethiopian Abyssinian colonial rule drawing parallels to the Irish under British rule It explores how the Oromo faced colonization cultural delegitimization land dispossession poverty and famine worsened by European empire builders Successive Ethiopian regimes deepened inequality suppressed Oromo self determination and exploited their resources leading to extreme poverty homelessness and disease The book argues that colonialism violated the Oromo people's sovereignty and rights resulting in social inequality and unhealthy conditions It calls for integrating self determination into public health agendas to improve social relationships and conditions emphasizing that colonialism acts as a disease causing agent by perpetuating preventable diseases and social inequities *The Routledge Companion to Christian Ethics* D. Stephen Long, Rebekah L. Miles, 2023-01-01 The Routledge Companion to Christian Ethics brings together two different but related disciplines the first is contemplative or theoretical asking what are the beliefs or doctrines that characterize Christianity whilst the second is practical asking what are the ethical practices that attend its teachings The movement between the theoretical and practical aspects is not however one way as doctrine and life are mutually informing In this comprehensive volume leading scholars address key topics problems and debates in this hotly debated topic within a truly global context Comprising over 35 chapters by a team of international contributors the handbook is divided into three parts based on the three persons of the Trinity God the Father God the Son and God the Holy Spirit Within these sections cutting edge issues are examined including God and genetics War peace and violence White supremacy Creation and sexuality Digital ethics Transgender studies Climate change Immigration and refugees Adopting a practical approach that must consider new concerns that have arisen with recent social political and cultural shifts The Routledge Companion to Christian Ethics is essential reading for students and researchers in Christian ethics religious ethics and Christianity studies The handbook will also be very useful for those in related fields such as ethics and philosophy *Embodying Borders* Laura Ferrero, Ana Cristina Vargas, Chiara Quagliariello, 2021-01-14 Based on extensive field research the essays in this volume illuminate the experiences of migrants from their own point of view providing a critical understanding of the complex social reality in which each experience is grounded Access to medical care for migrants is a fundamental right which is often ignored The book provides a critical understanding of the social reality in which social inequalities are grounded and offers the opportunity to show that right to health does not correspond uniquely with access to healthcare *Vulnerability Marginalization and Culture* Rashmi Pramanik, Uwe Skoda, Lidia Guzy, 2018-01-01 This Felicitation Volume is dedicated to Professor Deepak Kumar Behera and his contribution to the Anthropology of Odisha India and beyond It highlights the intersections of the concepts of vulnerability

marginalization and culture pivotal for his research which constantly sensitized the academic community as well as the wider society to these themes throughout his career The volume brings together researchers from India and beyond who collaborated with Professor Behera throughout the last years All chapters focus on a fieldwork orientated approach leading to rich ethnographic analyses informed by a long term engagement between researcher and interlocutors The Digital Coloniality of Power Alexander I. Stingl, 2015-12-16 Trouble is afoot in Digital Culture and Nerdland These are Alexander I Stingl claims not the engine of freedom and democracy that they once were hailed to be this much is already clear in the wake of the snooping and surveillance crises that broke in recent years Digitalization is but another version of the coloniality of power and being that has been at work for decades and centuries He poses the question whether Digital Age possess the legitimacy that digitalization has claimed His response is critically realistic but he doesn't stop at a critique for criticism's sake Inspired by the ideas of decolonial scholars feminist science studies current biological and neuro cognitive research and sociologists capable of reflection and self criticism Stingl attempts to break the canvas of sociology and show that adding a third and decolonial dimension to the two dimensional sociological imagination is indeed possible He illustrates that it is possible that class rooms free speech on internet and the inequalities in the production and distribution of a new form of social capital digital cultural health care capital can be subjected to a decolonial perspective along a sociological line of inquiry if sociologists allow for relations with other disciplines and scholarship to be integrative conversations The goal of this book is not to offer results or closed arguments but to create instead platforms for thinking further opening new lines of inquiry and to argue that it is not enough to identify problems or to attempt solve the problems with politics or best practice solutions Instead he proposes we must learn to identify and make use of the opportunities that are produced by any problem Stingl's conclusion is in short that a sociology that takes the decolonial challenge and critique seriously can not be a sociological sub discipline or a sociology of a problem but it must be a sociology of opportunities *Race, Politics, and Pandemic Pedagogy* Henry A. Giroux, 2021-01-14 In this book Henry A Giroux passionately argues that education and critical pedagogy are needed now more than ever to combat injustices in our society caused by fake news toxic masculinity racism consumerism and white nationalism At the heart of the book is the idea that pedagogy has the power to create narratives of desire values identity and agency at time when these narratives are being manipulated to promote right wing populism and emerging global fascist politics The book expands on the notion of the plague as not only a medical crisis but also a crisis of politics ethics education and democracy itself The chapters cover a range topics beginning with historical perspectives on fascism and moving on to issues of social atomization depoliticization neoliberal pedagogy the scourge of staggering inequality populism and pandemic pedagogy The book concludes with a call for educators to make education central to politics develop a discourse of critique and possibility reclaim the vision of a radical democracy and embrace their role as powerful agents of change **Secrecy and Responsibility in the Era of an Epidemic** Hanne Overgaard

Mogensen,2020-07-29 A narrative ethnography about a Ugandan woman and her relatives this novelistic fine grained volume shows how global questions of responsibility and inequity travel in family networks and confront people with decisions about life and death It is a story of existence under extremely challenging conditions about belonging and marginalization about the opacity and ambiguity of social relations and about growing up in a country haunted by violence and civil war only to be later lifted by optimism and devastated anew by the AIDS epidemic The story draws on long term fieldwork and letters from the woman who takes centre stage in the story while at once providing unique and privileged insight into the ethical challenges of a research method that demands personal involvement that is ultimately withdrawn for scholarly analysis

Attachments to War Jennifer Terry, 2017-10-19 In *Attachments to War* Jennifer Terry traces how biomedical logics entangle Americans in a perpetual state of war Focusing on the Afghanistan and Iraq wars between 2002 and 2014 Terry identifies the presence of a biomedicine war nexus in which new forms of wounding provoke the continual development of complex treatment rehabilitation and prosthetic technologies At the same time the U S military rationalizes violence and military occupation as necessary conditions for advancing medical knowledge and saving lives Terry examines the treatment of war generated polytrauma postinjury bionic prosthetics design and the development of defenses against infectious pathogens showing how the interdependence between war and biomedicine is interwoven with neoliberal ideals of freedom democracy and prosperity She also outlines the ways in which military sponsored biomedicine relies on racialized logics that devalue the lives of Afghan and Iraqi citizens and U S veterans of color Uncovering the mechanisms that attach all Americans to war and highlighting their embeddedness and institutionalization in everyday life via the government media biotechnology finance and higher education Terry helps lay the foundation for a more meaningful opposition to war *Making Threats* Betsy Hartmann, Banu Subramaniam, Charles Zerner, 2005-11-01 Today we live in times of proliferating fears The daily updates on the ongoing war on terror amplify fear and anxiety as if they were necessary and important aspects of our reality Concerns about the environment increasingly take center stage as stories and images abound about deadly viruses alien species invasions scarcity of oil water food safety of GMOs biological weapons and fears of overpopulation *Making Threats*

Biofears and Environmental Anxieties addresses how such environmental and biological fears are used to manufacture threats to individual national and global security Contributors from environmental studies political science international security biology sociology and anthropology discuss what they share in common the view that fears should be critically examined to avoid unnecessary alarm and scapegoating of people and nations as the enemy Other In these highly original and thought provoking essays Making Threats focuses on five themes security scarcity purity circulation and terror No other book has systematically examined the proliferation of fear in the context of current world events and from such a multidisciplinary perspective It consolidates in one place cutting edge research and reflection on how the contemporary landscape of fear shapes and is shaped by environmental and biological discourses By uncovering the linguistic tools that make fear resonate in the public consciousness by identifying the interests that create or are sustained by fears in short by giving fears histories Making Threats Biofears and Environmental Anxieties engages with some of the most potent and disturbing political and cultural aspects of the contemporary scene

The Diversity Paradox J. Jacob Jenkins, 2013-11-22

In recent years a sense of community has declined throughout the United States This trend is especially evident among younger generations whether measured by civic participation political involvement or religious affiliation Central Community Church an intercultural congregation located in Tampa Bay's urban corridor has responded to this trend by promoting community as an organizational metaphor The Diversity Paradox Seeking Community in an Intercultural Church explores the ways in which that metaphor was co constructed by Central Community's racially ethnically diverse leaders and members as well as limitations and tensions that emerged from those efforts After surveying the three prevailing views of community community as physical space community as disembodied concept and community as communicative process Jenkins builds upon four years of ethnographic fieldwork in order to fully understand this community He concludes by introducing an original theoretical concept called the diversity paradox an emphasis placed upon one potential understanding of diversity which paradoxically limits opportunities for alternative expressions of difference

The State of Capitalism Costas

Lapavistas, EReNSEP Writing Collective, 2023-08-29 Thinking beyond pandemic capitalism The health emergency that broke out in 2020 is a landmark event in the development of capitalism confirming the underlying change signalled by the Great Crisis of 2007-9 The pandemic has catapulted the state to the centre of economic activity However a historic impasse is steadily becoming apparent at the core of the world economy Productive accumulation is flaccid as both profitability and labour productivity are weak Financialisation has entered a new phase as shadow banking grew relative to other banks but is entirely dependent on the state The power of the state derives from command over fiat money and can certainly deliver enormous boosts to aggregate demand but that is not enough to tackle the weakness of the productive sector The rise in inflation for the first time in forty years indicates the impasse There is a transparent need for intervention on the supply side directly challenging capitalist property rights There is no evidence however that the ruling blocs in core countries would

engage in such policies The pandemic crisis also brought to the fore fresh divisions of core and periphery across the world economy Imperialism has assumed new forms spurred by globally active financial capital and internationalised productive capital A renewed contest for hegemony has emerged as US power declined The economic challenge of China will unfold steadily in the years ahead intensifying political tensions and military rivalries This book is the work of a research collective comprising authors from several parts of the world It analyses these vital issues from the perspective of Marxist political economy and puts forth alternative anticapitalist proposals
