Informed Consent Information Production And Ideology:

Informed Consent Lisa R. Schiff, 2003 How many Americans are homeless Although taking a census may sound simple ensuring an accurate count is the least of its problems Census takers in all walks of life exercise great care in determining what information is to be collected how it is to be recorded and how the findings are ultimately to be presented But who decides which evaluation frameworks and indicators are to be used Do all concerned census takers and respondents view those indicators in the same manner Do institutional and social imperatives outweigh individual bias and perspective And if so is that really what we want Informed Consent analyzes the interplay between ideology and information Through extensive research on how information about the homeless is generated and interpreted Lisa Schiff offers both hard evidence and a convincing argument for questioning how service providers create forms and clients complete them how advocates administer surveys and public agencies compile counts At the same time she explores the day to day implications of her findings by demonstrating how competing understandings affect prevailing ideologies which in turn affect our attempts at social change

Making Institutional Repositories Work Burton B. Callicott, David Scherer, Andrew Wesolek, 2015-11-15 Quickly following what many expected to be a wholesale revolution in library practices institutional repositories encountered unforeseen problems and a surprising lack of impact Clunky or cumbersome interfaces lack of perceived value and use by scholars fear of copyright infringement and the like tended to dampen excitement and adoption This collection of essays arranged in five thematic sections is intended to take the pulse of institutional repositories to see how they have matured and what can be expected from them as well as introduce what may be the future role of the institutional repository Making Institutional Repositories Work takes novices as well as seasoned practitioners through the practical and conceptual steps necessary to develop a functioning institutional repository customized to the needs and culture of the home institution The first section covers all aspects of system platforms including hosted and open source options big data capabilities and integration and issues related to discoverability The second section addresses policy issues from the basics to open source and deposit mandates The third section focuses on recruiting and even creating content Authors in this section will address the ways that different disciplines tend to have different motivations for deposit as well as the various ways that institutional repositories can serve as publishing platforms The fourth section covers assessment and success measures for all involved librarians deans and administrators The theory and practice of traditional metrics alt metrics and peer review receive chapter length treatment The fifth section provides case studies that include a boots on the ground perspective of issues raised in the first four sections By noting trends and potentialities this final section authored by Executive Director of SPARC Heather Joseph makes future predictions and helps managers position institutional repositories to be responsive change and even shape the evolution of scholarly communication

Needs and Capacity Assessment Strategies for Health Education and Health Promotion Gary D. Gilmore, M. Donald Campbell, 2005 The only text of its kind available for health

and human service practitioners the Third Edition of Needs and Capacity Assessment Strategies for Health Education and Health Promotion continues to be a highly regarded practitioner's guidebook that is used in upper division undergraduate and graduate professional preparation classes. Each one of the twelve chapters in this edition reflects practitioner involvement in needs and capacity assessments. This is truly a hands-on guidebook for those in their professional preparation phases as well as seasoned practitioners in public health, health care, human service, and other community-based professional endeavors.

Needs and Capacity Assessment Strategies for Health Education and Health Promotion - BOOK ALONE Gary D. Gilmore, 2011-08-18. Needs and Capacity Assessment Strategies for Health Education and Health Promotion Fourth Edition provides practitioners with a handbook that can be used in the classroom and in the field. It focuses on realistic needs and capacity assessment strategies with considerations for preparation, implementation, and incorporation of findings into the planning process. It also provides an overview of settings, specific target audiences, approaches to assessing needs, and recommendations for addressing problems encountered along the way. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Visual Methodologies Gillian Rose, 2016-03-26. Now in its Fourth Edition, Visual Methodologies: An Introduction to Researching with Visual Materials is a bestselling critical guide to the study and analysis of visual culture. Existing chapters have been fully updated to offer a rigorous examination and demonstration of an individual methodology in a clear and structured style. Reflecting changes in the way society consumes and creates its visual content, new features include: Brand new chapters dealing with social media platforms, the development of digital methods, and the modern circulation and audienceing of research images. More Focus features covering interactive documentaries, digital story telling, and participant mapping. A Companion Website featuring links to useful further resources relating to each chapter. A now classic text, Visual Methodologies appeals to undergraduates, graduates, researchers, and academics across the social sciences and humanities who are looking to get to grips with the complex debates and ideas in visual analysis and interpretation.

American Book Publishing Record, 2003. **The Creative Ethnographer's Notebook** Melisa Cahnmann-Taylor, Kristina Jacobsen, 2024-10-28. The Creative Ethnographer's Notebook offers emerging and trained ethnographers exercises to spark creativity and increase the impact and beauty of ethnographic study. With contributions by emerging scholars and leading creative ethnographers working in various social science fields (e.g., anthropologists, educators, ethnomusicologists, political scientists, geographers, and others), this volume offers readers a variety of creative prompts that ethnographers have used in their own work and university classrooms to deepen their ethnographic and artistic practice. The contributions foreground different approaches in creative practice, broadening the tools of multimodal ethnography as one designs a study, works with collaborators, and landscapes, and renders ethnographic findings through a variety of media. Instructors will find dozens of creative prompts to use in a wide variety of classroom settings, including early beginners to experienced ethnographers and artists. In the eBook version of this book, there are numerous pop

up definitions to key ethnographic terms links to creative ethnographic examples possibilities for extending prompts for more advanced anthropologists and helpful tips across all phases of inquiry projects This resource can be used by instructors of anthropology and other social sciences to teach students how to experiment with creative approaches as well as how to do better public and engaged anthropology Artists and arts faculty will also benefit from using this book to inspire culturally attuned art making that engages in research as well as research based art Readers will learn how creative ethnography draws on aspects of the literary visual sonic and or performing arts Information is provided about how scholars and artists or scholarartists document culture in ways that serve more diverse public and academic audiences Political Marketing

Research Norman K. Denzin (ed), Yvonna S. Lincoln, 2005 A thoroughly revised updated edition this volume includes new chapters on auto ethnography critical race theory queer theory testimonies *Feminisms in Social Work Research*

Stéphanie Wahab, Ben Anderson-Nathe, Christina Gringeri, 2014-07-25 Social work as a profession and academic discipline has long centered women and issues of concern to women such as reproductive rights labor rights equal rights violence and poverty In fact the social work profession was started by and maintained in large part by women and has been home to several generations of feminists starting with recognized first wave feminists This wide ranging volume both maps the contemporary landscape of feminist social work research and offers a deep engagement with critical and third wave feminisms in social work research Showcasing the breadth and depth of exemplary social work feminist research the editors argue that social work's unique focus on praxis daily proximities to privilege and oppression concern with social change and engagement with participatory forms of inquiry place social workers in a unique position to both learn from and contribute to

broader social science and humanities discourse associated with feminist research The authors attend here to their specific claims of feminisms articulate deep engagement with theory address the problematic use of binaries and engage with issues associated with methods that are consistently of interest to feminist researchers such as power and authority ethics reflexivity praxis and difference Comprehensive and containing an international selection of contributions Feminisms in Social Work Research is an important reference for all social work researchers with an interest in critical perspectives

The Manufacture of Consent Stephen M. Underhill, 2020-02-01 The second Red Scare was a charade orchestrated by a tyrant with the express goal of undermining the New Deal so argues Stephen M Underhill in this hard hitting analysis of J Edgar Hoover s rhetorical agency Drawing on Classification 94 a vast trove of recently declassified records that documents the longtime FBI director s domestic propaganda campaigns in the mid twentieth century Underhill shows that Hoover used the growing power of his office to subvert the presidencies of Franklin D Roosevelt and Harry S Truman and redirect the trajectory of U S culture away from social democracy toward a toxic brand of neoliberalism He did so with help from Republicans who opposed organized labor and Southern Democrats who supported Jim Crow in what is arguably the most culturally significant documented political conspiracy in U S history a wholesale domestic propaganda program that brainwashed Americans and remade their politics Hoover also forged ties with the powerful fascist leaders of the period to promote his own political ambitions All the while as a love letter to Clyde Tolson still preserved in Hoover s papers attests he strove to pass for straight while promoting a culture that demonized same sex love The erosion of democratic traditions Hoover fostered continues to haunt Americans today

Multiple Experiences of Modernity Oliver Kozlarek, 2014 Contemporary theories of modernity recognize the plurality or multiplicity of modernities Often the differences are seen as institutional or cultural differences Although this sort of research is important it cannot be ignored that it does not provide a clear understanding of the human consequences The tradition that today is known under the name of Critical Theory on the contrary has been interested always first of all in the human consequences This book wants to follow this ambition The question it tries to search answers for is what are the experiences that human beings are making in and within global modernity Another question is important what are the affinities and what are the differences Also Critical Theory was mainly interested in the Western experiences with and within global modernity The book will challenge this limited view by looking how modernities is experienced in other parts of the world 0Following the tradition of critical theory the volume enquires into the experiences people make with and in global modernity It thereby seeks to draw attention to both affinities and differences in these experiences and to depart from the western horizon of experience and consider other forms of experience Current theories of modernity are based on the assumption of the diversity of modernity This diversity is frequently understood to be the outcome of institutional and cultural differences

Current Trends in Environmental Psychology, volume I, 2nd edition Giuseppe Carrus, Eugenio De Gregorio, Frederica Caffaro, Sabine Pirchio, Lorenza

Tiberio,2023-07-18 This Research Topic is linked to the 3rd International Conference of Environmental Psychology ICEP 2021 to be held in Siracusa Italy 4 9 October 2021 The ICEP is one of the most important scientific events in the global community for experienced scholars junior researchers and professionals working in the field of Environmental Psychology across the world Submissions to this Research Topic welcome but are not limited to works that have been presented on site and virtually at the ICEP 2021 Research Topic articles will be published immediately once accepted in the journal This Research Topic aims to promote the scientific debate over the most recent empirical findings and theoretical advances in Environmental Psychological science and to build evidence based knowledge and innovative approaches to understand the relationship between humans and their socio physical environments It aims at hosting empirical and theoretical works that contribute at advancing our scientific knowledge on some of the most urgent challenges of contemporary human society

Evidence-based Practice in Social Work Ian Mathews,Karin Crawford,2011-06-16 At a time when the credibility of social work is again being questioned this book offers a critical approach to the debate concerning the reliability and validity of the evidence research and knowledge that underpins professional social work practice It critiques the notion of evidence and argues that knowledge is a much broader more appropriate concept to consider There is analysis of the different components and sources of this knowledge and an exploration of the often discordant interface between practice and knowledge Finally it supports the view that knowledge can be actively developed and tested by a range of people The ethics of researching the far right Antonia Vaughan,Joan Braune,Meghan Tinsley,Aurelien Mondon,2024-05-07 At a time when far radical and extreme right politics are becoming increasingly mainstream globally sometimes with deadly consequences research in these fields is essential to understand the most effective ways to combat these dangerous ideologies Yet engaging with texts and movements that do physical and verbal violence raises a number of urgent ethical issues Until recently this has remained understudied as scholarship on the far right rarely delves explicitly and critically into the ethics of research This book seeks to remedy this significant gap in an otherwise extensive and growing literature Originating from a workshop series in 2020 in which an international group of academics at various career stages shared the ethical challenges and best practices they had developed in their research this edited collection draws together insights from these ongoing conversations offering urgent critical reflections on key ethical issues **Managing Business Ethics** Alfred A. Marcus,Timothy J. Hargrave,2019-12-19 Managing Business Ethics Making Ethical Decisions teaches students how to navigate ethical issues they will encounter using the weight of reasons approach applied throughout the book This decision making framework s goal is not to faithfully apply particular philosophical perspectives on what is right but rather to solve ethical problems The authors underscore the need for employees at all levels to carefully consider the ethical implications of their actions using this approach and it can be applied at the individual organizational and stakeholder levels Chapters provide a case to walk through application of the framework and mini cases allow students to practice applying this

framework on their own A wide range of real world case studies are presented featuring companies such as Facebook Google Wells Fargo Volkswagen and Amazon This practical down to earth text also delves into topics not covered extensively by other books such as slow and fast thinking the inherent conflict between the individual and organization conformity and the difficulties of speaking truth to power Students are offered ample opportunity to engage in thoughtful reflection discussion and application as they grapple with ethical issues big and small Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides

A History and Theory of Informed Consent Ruth R. Faden, Tom L. Beauchamp, Nancy M. P. King, 1986 Clearly argued and written in nontechnical language this book provides a definitive account of informed consent It begins by presenting the analytic framework for reasoning about informed consent found in moral philosophy and law The authors then review and interpret the history of informed consent in clinical medicine research and the courts They argue that respect for autonomy has had a central role in the justification and function of informed consent requirements Then they present a theory of the nature of informed consent that is based on an appreciation of its historical roots An important contribution to a topic of current legal and ethical debate this study is accessible to everyone with a serious interest in biomedical ethics including physicians philosophers policy makers religious ethicists lawyers and psychologists This timely analysis makes a significant contribution to the debate about the rights of patients and subjects

Informed Choice in Maternity Care Mavis Kirkham, 2004-08-23 Informed choice in maternity care is government policy and is therefore an important issue in the education of midwives and obstetricians This book brings together key research in the area and provides a forum for the concerns of all involved Contributors are drawn from a wide range of perspectives including service users lay support groups midwives social scientists obstetricians nursing and law Informed Choice in Maternity Care is timely topical and covers a number of current debates

The Human Microbiome Rosamond Rhodes, Nada Gligorov, Abraham Paul Schwab, 2013-08-15 The human microbiome is the bacteria viruses and fungi that cover our skin line our intestines and flourish in our body cavities Work on the human microbiome is new but it is quickly becoming a leading area of biomedical research What scientists are learning about humans and our microbiomes could change medical practice by introducing new treatment modalities This new knowledge redefines us as superorganisms comprised of the human body and the collection of microbes that inhabit it and reveals how much we are a part of our environment The understanding that microbes are not only beneficial but sometimes necessary for survival recasts our interaction with microbes from adversarial to neighborly This volume explores some of the science that makes human microbiome research possible It then considers ethical legal and social concerns raised by microbiome research Chapters explore issues related to personal identity property rights and privacy The authors reflect on how human microbiome research challenges reigning views on public health and research ethics They also address the need for thoughtful policies and procedures to guide the

use of the biobanked human samples required for advancing this new domain of research In the course of these explorations they introduce examples from the history of biomedical science and recent legal cases that shed light on the issues and inform the policy recommendations they offer at the end of each topic s discussion This volume is the product of an NIH Human Microbiome Project grant It represents three years of conversations focused on consensus formation by the twenty seven members of the interdisciplinary Microbiome Working Group The microbiome is a relatively new area of medical attention Ethical issues related to the microbiome have barely been identified much less carefully analyzed This volume is an excellent start toward that ethical analysis Many of the arguments are persuasive and provocative In particular some contributors challenge the ethical need for anonymizing microbiome specimens as well as the need for individual informed consent for specific uses of these specimens I highly recommend this volume for all those interested in the microbiome and in new frontiers in medical ethics Leonard M Fleck Michigan State University
