Proceedings of the 3rd International Conference on Electrical and Information Technologies for Rail Transportation (EITRT) 2017 Limin Jia,Yong Qin,Jianguo Suo,Jianghua Feng,Lijun Diao,Min An,2018-03-30 The proceedings collect the latest research trends methods and experimental results in the field of electrical and information technologies for rail transportation The topics cover novel traction drive technologies of rail transportation safety technology of rail transportation system rail transportation information technology rail transportation operational management technology rail transportation cutting edge theory and technology etc The proceedings can be a valuable reference work for researchers and graduate students working in rail transportation electrical engineering and information technologies

Engineering Mathematics and Artificial Intelligence Herb Kunze,Davide La Torre,Adam Riccoboni,Manuel Ruiz Galán,2023-07-26 The fields of Artificial Intelligence AI and Machine Learning ML have grown dramatically in recent years with an increasingly impressive spectrum of successful applications This book represents a key reference for anybody interested in the intersection between mathematics and AI ML and provides an overview of the current research streams Engineering Mathematics and Artificial Intelligence Foundations Methods and Applications discusses the theory behind ML and shows how mathematics can be used in AI The book illustrates how to improve existing algorithms by using advanced mathematics and offers cutting edge AI technologies The book goes on to discuss how ML can support mathematical modeling and how to simulate data by using artificial neural networks Future integration between ML and complex mathematical techniques is also highlighted within the book This book is written for researchers practitioners engineers and AI consultants

Handbook of Mathematical Models and Algorithms in Computer Vision and Imaging Ke Chen,Carola-Bibiane Schönlieb,Xue-Cheng Tai,Laurent Younes,2023-02-24 This handbook gathers together the state of the art on mathematical models and algorithms for imaging and vision Its emphasis lies on rigorous mathematical methods which represent the optimal solutions to a class of imaging and vision problems and on effective algorithms which are necessary for the methods to be translated to practical use in various applications Viewing discrete images as data sampled from functional surfaces enables the use of advanced tools from calculus functions and calculus of variations and nonlinear optimization and provides the basis of high resolution imaging through geometry and variational models Besides optimization naturally connects traditional model driven approaches to the emerging data driven approaches of machine and deep learning No other framework can provide comparable accuracy and precision to imaging and vision Written by leading researchers in imaging and vision the chapters in this handbook all start with gentle introductions which make this work accessible to

graduate students For newcomers to the field the book provides a comprehensive and fast track introduction to the content to save time and get on with tackling new and emerging challenges For researchers exposure to the state of the art of research works leads to an overall view of the entire field so as to guide new research directions and avoid pitfalls in moving the field forward and looking into the next decades of imaging and information services This work can greatly benefit graduate students researchers and practitioners in imaging and vision applied mathematicians medical imagers engineers and computer scientists Proceedings of 17th International Conference on Machine Learning and Computing Lin Huang, David Greenhalgh, 2025-08-17 This book comprises original and peer reviewed research papers presented at 2025 17th International Conference on Machine Learning and Computing that was held in Guangzhou China from February 14 to 17 2025 The focus of the conference is to establish an effective platform for institutions and industries to share ideas and to present the works of scientists engineers educators and students from all over the world Topics discussed in this volume include Machine Learning Theory and Algorithms High performance Computing Models and Data Processing Large scale Language Models and Natural Language Processing Data oriented Information System Optimization and Intelligent Computing AI based Intelligent Control Systems and System Security etc The book will become a valuable resource for academics industry professionals and engineers working in the related fields of machine learning and computing

Mathematical Cardiac Electrophysiology Piero Colli Franzone, Luca Franco Pavarino, Simone Scacchi, 2014-10-30 This book covers the main mathematical and numerical models in computational electrocardiology ranging from microscopic membrane models of cardiac ionic channels to macroscopic bidomain monodomain eikonal models and cardiac source representations These advanced multiscale and nonlinear models describe the cardiac bioelectrical activity from the cell level to the body surface and are employed in both the direct and inverse problems of electrocardiology The book also covers advanced numerical techniques needed to efficiently carry out large scale cardiac simulations including time and space discretizations decoupling and operator splitting techniques parallel finite element solvers These techniques are employed in 3D cardiac simulations illustrating the excitation mechanisms the anisotropic effects on excitation and repolarization wavefronts the morphology of electrograms in normal and pathological tissue and some reentry phenomena The overall aim of the book is to present rigorously the mathematical and numerical foundations of computational electrocardiology illustrating the current research developments in this fast growing field lying at the intersection of mathematical physiology bioengineering and computational biomedicine This book is addressed to graduate student and researchers in the field of applied mathematics scientific computing bioengineering electrophysiology and cardiology Handbook of Research on Critical Issues and Global Trends in International Education Barker, Megel R., Hansen, Robyn Conrad, Hammer, Liam, 2023-11-24 The Handbook of Research on Critical Issues and Global Trends in International Education addresses the growing complexity and diversity of international schools by examining the critical issues and global trends faced by

practitioners in this field With a lack of research on the experiences and actions of school practitioners in these isolated workplaces this book aims to provide practical and evidence based solutions The book covers a wide range of topics including equity and access diversity teacher retention legal frameworks school typology governance cultural competence third culture kids leadership and practice technology and parent engagement Written by educational professionals researchers and anthropologists it offers a unique collection of voices from those with lived experiences in this field making it an invaluable resource for anyone interested in gaining a deeper understanding of the international school sector Whether you are an educator researcher policymaker school leader lecturer or anthropologist the Handbook of Research on Critical Issues and Global Trends in International Education is a must read comprehensive guide to the complexities and challenges of international education providing practical solutions for improving the quality of education in this rapidly evolving field If you are looking to gain a nuanced understanding of the critical issues facing international schools and evidence based approaches for addressing these challenges this book is the perfect resource for you

Rotating Machinery, Hybrid Test Methods, Vibro-Acoustics & Laser Vibrometry, Volume 8 James De Clerck, David S. Epp, 2025-08-07 Rotating Machinery Hybrid Test Methods Vibro Acoustics Laser Vibrometry Volume 8 Proceedings of the 34th IMAC A Conference and Exposition on Dynamics of Multiphysical Systems From Active Materials to Vibroacoustics 2016 the eighth volume of ten from the Conference brings together contributions to this important area of research and engineering The collection presents early findings and case studies on fundamental and applied aspects of Structural Dynamics including papers on Processing Modal Data Rotating Machinery Vibro Acoustics Laser Vibrometry Teaching Practices Hybrid Testing Reduced Order Modeling

Computational Learning Theory David Helmbold, Bob Williamson, 2001-07-04 This book constitutes the refereed proceedings of the 14th Annual and 5th European Conferences on Computational Learning Theory COLT EuroCOLT 2001 held in Amsterdam The Netherlands in July 2001 The 40 revised full papers presented together with one invited paper were carefully reviewed and selected from a total of 69 submissions All current aspects of computational learning and its applications in a variety of fields are addressed

Intelligent Tutoring Systems Stefano A. Cerri, William J. Clancey, Giorgos Papadourakis, Kitty-Kiriaki Panourgia, 2012-05-30 This book constitutes the refereed proceedings of the 11th International Conference on Intelligent Tutoring Systems ITS 2012 held in Chania Crete Greece in June 2012 The 28 revised full papers 50 short papers and 56 posters presented were carefully viewed and selected from 177 submissions The specific theme of the ITS 2012 conference is co adaption between technologies and human learning Besides that the highly interdisciplinary ITS conferences bring together researchers in computer science informatics and artificial intelligence on the one side and cognitive science educational psychology and linguistics on the other side The papers are organized in topical sections on affect emotions affect signals games motivation and design games empirical studies content representation feedback non conventional approaches conceptual content representation assessment constraints dialogue dialogue questions learner

modeling learning detection interaction strategies for games and empirical studies thereof in general Advanced Computational Techniques for Renewable Energy Systems Mustapha Hatti, 2023-02-13 In this book one hundred selected articles in which the technology and science elite share contribute to technology development collaborate and evolve the latest cutting edge technologies open ecosystem resources new innovative computing solutions hands on labs and tutorials networking and community building to ensure better integration of artificial intelligence into renewable energy systems Innovation in computing continues at a growing pace The key to success in this area is not only hardware but also the ability to leverage rapid advances in artificial intelligence including machine learning and deep learning data analytics data streaming and cloud computing which go hand in hand with intensive research activity on the underlying computational methods The chapters in this book are organized into thematic sections on advanced computing techniques artificial intelligence smart and sustainable cities renewable energy systems materials in renewable energy smart energy efficiency smart cities applications recent developments and new trends online supervision of renewable energy platforms predictive control in renewable systems smart embedded systems for photovoltaic applications **Advances in Neural Computation, Machine Learning, and Cognitive Research IX** Boris Kryzhanovsky, Witali Dunin-Barkowski, Vladimir Redko, Yury Tiumentsev, Valentin V. Klimov, 2025-10-11 This book describes new theories and applications of artificial neural networks with a special focus on answering questions in neuroscience biology and biophysics and cognitive research It covers a wide range of methods and technologies including deep neural networks large scale neural models brain computer interface signal processing methods as well as models of perception studies on emotion recognition self organization and many more The book includes both selected and invited papers presented at the XXVII International Conference on Neuroinformatics held on October 20 24 2025 in Moscow Russia Handbook of AI-Based Mechatronics Systems and Smart Solutions in Industrial Automation Pushpalatha Naveenkumar, Vandana Sharma, Gunapriya Devarajan, Azween Abdullah, Ahmed A. Elngar, 2025-09-02 Artificial intelligence AI and mechatronics are booming areas where most of the industrial sectors are becoming smart nowadays This handbook includes material of multidisciplinary content from the AI mechanical and electronics engineering domains among others It gives insights into various application sectors discussing current global developments in mechatronics employing AI technology and addressing the complexity of current issues and the effects of diverse mechatronics systems Handbook of AI Based Mechatronics Systems and Smart Solutions in Industrial Automation focuses on system automation predictive analysis preventive analysis and real time decision making systems for next generation automation It discusses the advancements of mechatronics systems using AI applications along with the global approach toward smart industrial automation and presents the impact of AI on today s work of autonomous and industrial automation The book discusses future research potential and is beneficial to manufacturing healthcare and finance disputes while it offers AI algorithms to analyze large amounts of data and identifies patterns trends and anomalies for accurate

predictions and optimization processes The handbook also addresses use cases and case studies related to AI in mechatronics along with applications Scholars in the field of AI in mechatronics and related applications will find this book useful In particular attention is drawn to both fundamental ideas and important practical contexts Readers interested in the most recent findings in the field of problem oriented processing approaches in mechatronics including those in academia data science industry research and graduate and undergraduate students will find this fascinating handbook extremely interesting

Advances in Systems, Control and Automation Avinash Konkani,Rabindranath Bera,Samrat Paul,2017-12-11 This book comprises the select proceedings of the ETAEERE 2016 conference The book aims to shed light on different systems or machines along with their complex operation behaviors and linear nonlinear relationship in different environments It covers problems of multivariable control systems and provides the necessary background for performing research in the field of control and automation Aimed at helping readers understand the classical and modern design of different intelligent automated systems the book presents coverage on the control of linear and nonlinear systems intelligent systems stochastic control knowledge based systems applications fault diagnosis and tolerant control real time control applications etc The contents of this volume will prove useful to researchers and professionals alike

Kim Sutton Math Conferences Book Review: Unveiling the Magic of Language

In an electronic digital era where connections and knowledge reign supreme, the enchanting power of language has become apparent than ever. Its power to stir emotions, provoke thought, and instigate transformation is really remarkable. This extraordinary book, aptly titled "**Kim Sutton Math Conferences**," written by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound affect on our existence. Throughout this critique, we shall delve into the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
