Mass Communication Theory Stanley J. Baran, Dennis K. Davis, 1995 This textbook provides a comprehensive historically based authoritative introduction to mass communication theory. It is clearly written with examples, graphics, and other materials to illustrate key theories. It traces the emergence of two main bodies of mass communication theory: social and behavioral and critical and cultural, providing many examples of each and an in-depth discussion of the strengths and limitations of these two types of theory. The book emphasizes that media theories are human creations that typically are intended to address specific problems or issues. The book's contextual information about the motives of theorists and the problems/issues they address make it easier for students to learn theory.

Applied Mass Communication Theory Jack Rosenberry, Lauren A. Vicker, 2021-09-30

Now in its third edition, this dynamic textbook blends coverage of the major theories and research methods in mass communication to enable students to apply their knowledge in today's media and communication careers. Maintaining a focus on modern professional application throughout, this text provides chronological coverage of the development and use of major theories, an overview of both quantitative and qualitative research methods, and a step-by-step guide to conducting a research project informed by this knowledge. It helps students bridge their academic coursework with professional contexts, including public relations, advertising, and digital media contexts. It provides breakout boxes with definitions of key terms and theories, extended applied examples, and graphical models of key theories to offer a visualization of how the various concepts in the theory fit together. Applied Mass Communication Theory's hybrid and flexible nature make it a useful textbook for both introductory and capstone courses on

mass communication and media theory and research methods as well as courses focused on media industries and professional skills. Instructors can access an online instructor's manual including sample exercises, test questions, and a syllabus at www.routledge.com/9780367630362. *The History of Media and Communication Research* David W. Park, Jefferson Pooley, 2008. Strictly speaking, James Carey wrote there is no history of mass communication research. This volume is a long overdue response to Carey's comment about the field's ignorance of its own past. The collection includes essays of historiographical self-scrutiny as well as new histories that trace the field's institutional evolution and cross-pollination with other academic disciplines. The volume treats the remembered past of mass communication research as crucial terrain where boundaries are marked off and futures plotted. The collection intended for scholars and advanced graduate students is an essential compass for the field.

The Handbook of Global Interventions in Communication Theory Yoshitaka Miike, Jing Yin, 2022-03-10. Moving beyond the U.S. Eurocentric paradigm of communication theory, this handbook broadens the intellectual horizons of the discipline by highlighting underrepresented, especially non-Western, theorists and theories and identifies key issues and challenges for future scholarship. Showcasing diverse perspectives, the handbook facilitates active engagement in different cultural traditions and theoretical orientations that are global in scope but local in effect. It begins by exploring past efforts to diversify the field, continuing on to examine theoretical concepts, models, and principles rooted in local cumulative wisdom. It does not limit itself to the mass interpersonal communication divide but rather seeks to frame theory as global and inclusive in scope. The book is intended for communication researchers and advanced students with relevance to scholars with an interest in theory within information science, library science, social and cross-cultural psychology, multicultural education, social justice, and social ethics, international relations, development studies, and political science.

Mass Communication Theories Melvin L. DeFleur, Margaret H. DeFleur, 2022-05-02. The second edition of this innovative textbook provides a comprehensive overview of mass communication theories as well as their origins and empirical supports in psychology, sociology, political science, and philosophy. Each chapter presents a specific theory, describing its basic structure in simple formal terms and providing an accessible summary of the research studies and scholarly writings from which it developed. It breaks each complex theory down into five or six interlinked basic propositions, making them easily digestible for students. This new edition includes up-to-date research, improved coverage of all theories presented, expanded treatments of theories such as cultivation theory, the spiral of silence, and framing, contemporary and social media examples, chapter discussion questions, and informative charts and figures. This textbook serves as an accessible core text for undergraduate and graduate Mass Communication, Communication Theory, and Communication and Society courses.
