Mastering Expert Testimony William T. Tsushima, Robert M. Anderson, Jr., Robert M. Anderson, 1996-09 The past two decades have seen a rapidly growing involvement of psychologists and psychiatrists in legal proceedings for criminal cases divorces and traffic and industrial accidents Mental health professionals are traditionally not trained to cope with the legal responsibilities that arise from their routine clinical work and are eager to learn the professional skills that are needed in forensic settings There is presently no book which focuses entirely on the strategies and verbal tactics employed by attorneys who critically examine and challenge the testimony of mental health professionals If psychologists and psychiatrists can familiarize themselves with the kind of questions and verbal exchanges that take place in the courtroom they would be better prepared to provide their expertise in an effective manner This book fills that need Designed as a practical handbook to assist practitioners from all mental health disciplines it focuses on typical courtroom dialogue between attorneys and mental health professionals who testify regarding their psychotherapy clients and also those who are hired by attorneys specifically to provide expert opinions The authors who have extensive experience in the courtroom offer well thought out effective responses as contrasted with impulsive and weak answers to attorneys queries Actual cases are employed to illustrate typical challenges in various legal areas including criminal law child custody hearings and personal injury cases Certain forensic issues such as the scientific bases of expert opinions the accuracy of psychological vs medical tests and malingering are emphasized throughout the chapters The book is based on the belief that exposure to courtroom dialogue enhances the awareness of appropriate professional responses to an attorney's cross examination and greatly alleviates fear toward a situation well known to provoke intense levels of anxiety Although it is written alluding to the forensic psychologist or

psychiatrist the strategies for the witness are readily applicable in most instances to all mental health professionals Issues such as therapist bias unconfirmed observations and cultural and ethnic factors are clearly relevant to all who provide mental health services Sexual Freedom and Its Impact on Economic Growth and Prosperity Feler Bose,2024-12-20

Many today believe that all forms of freedom economic political and sexual are inherently beneficial However J D Unwin argues that limiting sexual freedom is crucial for cultural and economic advancement He observed that sexual freedom and economic freedom are substitutes but did not fully explain why In this book Feler Bose aims to provide a causal explanation for what he calls Unwin s thesis Unwin suggests that Pauline absolute monogamy was essential for the sustained economic growth experienced by Northwest Europe particularly England Regarding this the Protestant Reformation played a pivotal role by promoting literacy and Bible reading which helped internalize norms across a broad section of the population This cultural shift contributed to the economic takeoff in the nineteenth century The book also examines various theories on why rapid economic growth occurred in England and argues that these theories are incomplete without considering Unwin s thesis By understanding the relationship between sexual norms and economic development we can gain deeper insights into the factors that drive societal progress This exploration highlights the importance of cultural and moral frameworks in shaping economic outcomes and underscores the complex interplay between different forms of freedom

Learning from Error in Policing Jon Shane, 2013-04-16 While the proximate cause of any accident is usually someone s immediate action or omission failure to act there is often a trail of underlying latent conditions that facilitated their error the person has in effect been unwittingly set up for failure by the organization This Brief explores an accident in policing as a framework for examining existing police practices Learning from Error in Policing describes a case of wrongful arrest from the perspective of organizational accident theory which suggests a single unsafe act in this case a wrongful arrest is facilitated by several underlying latent conditions that triggered the event and failed to stop the harm once in motion The analysis demonstrates that the risk of errors committed by omission failing to act were significantly more likely to occur than errors committed by acts of commission By examining this case policy implications and directions for future research are discussed The analysis of this case and the underlying lessons learned from it will have important implications for researchers and practitioners in the policing field
