Apple Aperture 3 Ken McMahon,Nik Rawlinson,2012-09-10 Aperture is a dedicated end to end workflow tool for photographers and this book guides the reader through the complete process from capture to output The

beauty of Aperture is that unlike Adobe's rival workflow software Lightroom it doesn't force a particular structure or workflow on to the user. This more open ended approach means it is becoming increasingly popular with photographers but also means that there is a lot to learn for a newcomer to the software. Whether you are cataloging, organising and adding Metadata to thousands of RAW files, selecting, cropping and correcting an individual image or preparing files for final output to web or print, this book provides a complete reference for producing high quality results with Aperture. **Mastering**

Photoshop Layers Juergen Gulbins, 2013-12-08 Photoshop's layers are arguably the most powerful aspect of the software's user interface and are the key to successful image editing in Photoshop. Layers allow for both global and local adjustments to images and can be used to create a number of special effects. Best of all, layers allow for nondestructive editing of your original image. New Photoshop users often see layers as too complicated and they miss out on the program's full potential. This book will remove the confusion factor by providing an in-depth introduction to layers. Clear step by step instructions and illustrations help the reader quickly master the tools that are relevant for photographers. In this book you will learn about Working with and building multiple layers, Blending layers and which Options to use, Using layers to enhance and retouch your images, Creating and using layer masks, Creating luminosity and saturation layer masks, Using Smart Objects and Smart Filters, Advanced layer techniques, Time saving shortcuts, tips and tricks. *Mastering Digital Flash Photography* Chris

George, 2008 Electronic flash not only brings light to a photograph, it can be an important artistic tool if you've acquired the knowledge to use it creatively. To master those skills, digital photographers need only turn to this complete reference. Packed with inspirational photos, it takes the mystery out of flash, covering every type of equipment and explaining such essentials as guide numbers, sync speeds, white balance and more. Photographers will see how fill flash can decrease contrast and shadows in outdoor portrait photography, understand how to control the light using bounce and multiple flash techniques, and expertly employ high speed and rear curtain synchronization to create impressive motion blur images. Everything you need to know is here, including a section on studio flash and computer processing. **Mastering the Nikon** Darrell Young, 2013-03-22

Color and Mastering for Digital Cinema Glenn Kennel, 2012-07-26. *Color and Mastering for Digital Cinema* explores the implications for motion picture post production processes and changes required to the supporting equipment and software. While a new concept to the motion picture community, the selection of the wide gamut output referred XYZ color space for digital cinema distribution is based on decades of color science and experience in other industries. The rationale for choosing XYZ and the other color encoding parameters is explained, and the book also provides a full case study of the development of DLP Cinema projectors by Texas Instruments. Finally, this book explores how the XYZ color encoding concept can be extended to support enhanced display technologies in the future. This book contains brilliant 4 color illustrations that compliment the color science explanations. Never before published industry information from author Glenn Kennel, a world leader in digital cinema color technology. Descriptions of key issues and background on decisions that were made in the standardization process.

By Glenn Kennel. Glenn Kennel is VP GM of Feature Film Services at Laser Pacific Media Corporation, a leading provider of a full range of post production services for television and feature film. Recently he worked for the DLP Cinema group of Texas Instruments in a role that included technology and business development. Previously, in a twenty year career with Kodak, he led the development of the Cineon digital film scanners and laser recorders and the prototype HDTV telecine that became the Spirit Datacine. As a consultant, he helped DCI draft the technical specifications for digital cinema. Kennel also chairs the SMPTE DC28 Color ad hoc group and the DC28 20 Distribution working group. He is a SMPTE Fellow and has received the SMPTE Journal Award. He is also a member of the Academy of Motion Picture Arts and Sciences.
