An earlier edition of this book composed of chapters based on presentations from that conference was published in 2004. In 2018 a decision was made to revise this book from the inaugural conference updating some chapters and providing a new perspective on the ongoing work of the organization now called the Children's Spirituality Summit. For example, given the advances in what we are learning from brain research, a chapter on this topic has been extensively updated. What this revised volume provides is a collection of chapters offering theological perspectives, social science research, and insights on ministry practice about the spiritual lives of children, how they relate to God, how this relationship grows, and what helps in promoting the spiritual formation and vitality of children in the home, church, and school. This book offers twenty-three chapters by professors, graduate students, social science researchers, and ministry leaders from different denominational traditions, addressing a wide range of issues in theory, research, and ministry practice with children. This second edition offers much to learn from, stimulate your thinking, and improve your practice.

Research in the Social Scientific Study of Religion, Volume 31 Ralph W. Hood, Sariya Cheruvallil-Contractor, 2020-11-30. Volume 31 of *Research in the Social Scientific Study of Religion: A Diversity of Paradigms* showcases two approaches to the socio-scientific study of religion. It includes a special section within which authors draw on data collected about congregational life in the Australian National Church Life Surveys from 1991 to the present. These studies give voice to minority groups and children. While findings include the strengths of ethnic diversity and the positive experiences of young churchgoers, they also highlight that full inclusion in local church life is far from being realized. A second section explores the application of feminist approaches within the sociology of religion. In their struggle for equality for women, feminist scholars developed methodologies to challenge the marginality of any othered group. This section showcases how use of these methods challenges hierarchies within knowledge.
