

Module 11 Study Guide

Instructions: Use this document as a guide as you take notes while you complete this week's module. Answering the questions as you complete the module will help you as you complete the exams throughout the semester.

Chapter 10 Myers & Twenge

Note that these are things covered ONLY in the text. Many items in the text are also covered in the videos so please refer to both when completing this guide.

1. Explain the biological influences on aggression.

Gender, neural influences, genetic influences, biochemical influences (such as alcohol and drugs), diet, testosterone and serotonin.

2. Describe the frustration-aggression theory and define and recognize examples of relative deprivation.

Frustration-aggression theory: the theory that frustration triggers a readiness to aggress. An example of this theory is in a study where students who lost a multiplayer game blasted their opponents with longer and louder bursts of noise.

3. Explain the effects of the following on aggression: heat, alcohol, testosterone, genetics, & pain.

Higher heat, more alcohol consumption, higher testosterone and higher pain are factors that can increase aggression. Having genetic predispositions to being aggressive (such as having a parent who was a convicted murderer or abuser) is another factor that can increase aggression.

4. Explain how aggression is reduced and describe the effect of catharsis on aggression.

Aggression can be reduced by using "I" statements and allowing out anger to be heard in an assertive and not aggressive manner. Learning problem solving skills, emotional control and conflict resolution are also helpful for reducing aggression.

Catharsis causes aggression and anger to increase and have happiness levels decrease.

Aggression: Mini Lecture

1. Define the following terms and recognize examples of each: aggression, hostile aggression, instrumental aggression, social aggression, and physical aggression.

Aggression: physical or verbal behavior intended to hurt someone.

Hostile aggression: "hot", this aggression is impulsive and angry, the goal of it is to injure somebody. Example: you walk in on your girlfriend cheating on you and you impulsively want to hurt them.

Instrumental aggression: "cool", this aggression is premeditated, the goal of it is injury as a means to an end. Example: terrorist attacks, many people are injured but the goal is not just to harm people, the goal is to instill fear amongst a large group of people or a population. Another example is pirates on the open seas, they often do hurt people on the ships, but the real goal is to take the money or products on the ship.

IT Essentials Module 11 Study Guide:

IT Essentials Cisco Networking Academy, 2010-10-13 IT Essentials PC Hardware and Software Companion Guide Fourth Edition supports the Cisco Networking Academy IT Essentials PC Hardware and Software version 4.1 course. The course provides an introduction to computer components, laptops and portable devices, wireless connectivity, security and safety, environmental concerns, and diagnostic tools. As a CompTIA Authorized Quality Curriculum, the course helps you prepare for the CompTIA A certification. The fundamentals part of the course covered in Chapters 1-10 helps you prepare for the CompTIA A Essentials exam 220 701. You learn the fundamentals of computer technology, networking, and security and validate the communication skills and professionalism required of all entry-level IT professionals. The advanced part of the course covered in Chapters 11-16 helps you prepare for the CompTIA A Practical Application exam 220 702, providing more of a hands-on orientation and scenarios in which troubleshooting and tools must be applied to resolve problems. Students must pass both exams to earn the CompTIA A certification. The features of the Companion Guide are designed to help you study and succeed in this course.

- n Chapter objectives: Review core concepts by answering the focus questions listed at the beginning of each chapter.
- n Key terms: Refer to the updated lists of networking vocabulary introduced and turn to the highlighted terms in context.
- n Check Your Understanding Questions and Answer Key: Evaluate your readiness with the updated end-of-chapter questions that match the style of questions you see on the online course quizzes.

Virtual Desktop, Virtual Laptop, and Packet Tracer Activities on the CD that accompanies this book are virtual learning tools to help you develop critical thinking and complex problem-solving skills. New for this edition, Cisco Packet Tracer simulation-based learning activities promote the exploration of networking and network security concepts and allow you to experiment with network behavior. All the Labs, Worksheets, and Class Discussion Exercises from the course are available in the separate book *IT Essentials PC Hardware and Software Lab Manual Fourth Edition*. More than 120 activities emphasize the practical application of skills and procedures needed for hardware and software installations, upgrades, and troubleshooting systems.
