Case Tractor Manual J.I. Case Threshing Machine Company, 1922 Technical Manual United States. War Department, 1945 The Grey Zone Mark Lattimer, Philippe Sands, 2018-07-26 The high civilian death toll in modern protracted conflicts such as those in Syria or Iraq indicate the limits of international law in offering protections to civilians at risk A recent conference of states convened by the International Committee of the Red Cross referred to an institutional vacuum in the area of international humanitarian law implementation Yet both international humanitarian law and the law of human rights establish a series of rights intended to protect civilians But which law or laws apply in a particular situation and what are the obstacles to their implementation How can the law offer greater protections to civilians caught up in new methods of warfare such as drone strikes or targeted by new forms of military organisation such as transnational armed groups Can the implementation gap be filled by the growing use of human rights courts to remedy violations of the laws of armed conflict or are new instruments or mechanisms of civilian legal protection needed This volume brings together contributions from leading academic authorities and legal practitioners on the situation of civilians in the grey zone between human rights and the laws of war The chapters in Part 1 address key contested or boundary issues in defining the rights of civilians or non combatants in today s conflicts Those in Part 2 examine remedies and current mechanisms for redress both at the international and national level and those in Part 3 assess prospects for the development of new mechanisms for addressing violations As military intervention to protect civilians remains contested this volume looks at the potential for developing alternative approaches to the protection of civilians and their rights Manual on International Courts and Tribunals Ruth Mackenzie, Cesare P. R. Romano, Yuval Shany, Philippe Sands, 2010 The dramatic rise in the number of international courts and tribunals and the expansion of their legal powers has been one of the most significant developments in international law of the late 20th century The emergence of an international judiciary provided international law with a stronger than ever law enforcement apparatus and facilitated the transformation of many aspects of international relations from being power based to being law based The first edition of the Manual on International Courts and Tribunals published in 1999 was the first book to survey systematically this new institutional landscape by describing in an accessible and uniformly structured manner the legal powers and operating procedures of all major international judicial and quasi judicial bodies In doing so it laid the groundwork for comparative study and research of the law and practice of international courts and tribunals an emerging field of international legal research which has already spurred a series of publications conferences and academic courses This second edition updates the first edition by describing the many legal changes that have taken place in the last decade including important reforms in the laws and procedures of many international courts and tribunals relevant developments in their increasingly rich jurisprudence and the creation of new judicial fora Moreover it assesses the overall record of these judicial bodies The data and legal analysis offered in the book provide both practitioners and

Statistics Dept.,2002-01-01 The IMF s principal statistical publication International Financial Statistics IFS Online is the standard source of international statistics on all aspects of international and domestic finance For most countries IFS Online reports data on balance of payments international investment position international liquidity monetary and financial statistics exchange rates interest rates prices production government accounts national accounts and population Updated monthly **Air Force Manual** United States. Department of the Air Force,1959 **Armed Non-State Actors in International Humanitarian and Human Rights Law** Konstantinos Mastorodimos,2017-05-15 The accountability of armed non state actors is a neglected field of international law overtaken by the regimes of state responsibility and individual criminal accountability as well as fears of legitimacy Yet armed non state actors are important players in the international arena and their activities have significant repercussions This book focuses on their obligations and accountability when they do not function as state agents regardless of the existence or extent of accountability of their individual members The author claims that their distinct features lead to their classification into three different types de facto entities armed non state actors in control of territory and common article 3

armed non state actors The mechanisms that trigger the applicability of humanitarian and human rights law regimes are examined in detail as well as the framework of obligations In both cases the author argues that armed non state actors should not be treated as entering international law and process exclusively through the state The study concludes by focussing on their accountability in international humanitarian and human rights law and more specifically to the rules of attribution remedies and reparations for violations of their primary obligations Law on the battlefield A. P. V.

Rogers,2024-06-04 This book now fully updated and in its third edition explains the law relating to the conduct of hostilities and provides guidance on difficult or controversial aspects of the law It covers who or what may legitimately be attacked and what precautions must be taken to protect civilians cultural property or the natural environment It deals with the responsibility of commanders and how the law is enforced There are also chapters on internal armed conflicts and the security aspects of belligerent occupation **International Law and Weapons Review** Natalia Jevglevskaja,2021-12-16

International law requires that before any new weapon is developed purchased or modified the legality of its use must be determined This book offers the first comprehensive and systemic analysis of the law mandating such assessments Article 36 of the 1977 Additional Protocol I to the Geneva Conventions Underpinned by empirical research the book explores the challenges the weapons review authorities are facing when examining emerging military technology such as autonomous weapons systems and autonomous cyber capabilities It argues that Article 36 is sufficiently broad to cover a wide range of military systems and offers States the necessary flexibility to adopt a process that best suits their organisational demands While sending a clear signal that law should not simply follow technological developments but rather steer them the provision has its limits however which are shaped and defined by the interpretative decisions made by States
