Delta Urbanism: New Orleans Richard Campanella, 2017-11-08 This volume of APA's Delta Urbanism series traces the development of New Orleans from precolonial times to post Katrina realities in the context of the deltaic plain on which it lies. The book describes the underlying physical terrain and covers the various transformations humans have made to it: site selection, settlement, urbanization, population expansion, drainage, protection, exploitation, devastation, and recovery. What New Orleans has experienced foretells what similar cities will be tackling in years to come. **Kill Your Masters** Jaap van der Doelen, 2024-12-01 All the unwritten rules of rap say it doesn't happen like this. Yet Killer Mike, a Black man from Atlanta, Georgia, and El P, a white man from Brooklyn, New York, have transformed what should have been the twilight of their careers as rappers into their biggest spotlight yet. Known as the hip hop duo Run The Jewels, they have headlined festivals worldwide, become action figures, and Marvel comic book characters spearheaded a worldwide countercultural movement and played a significant role in the last two presidential elections. This is the buddy movie-like story of how they got there. It is a tale that parallels the incredible changes the music industry has gone through over the past twenty-five years, charting a course from the highs around the turn of the century to the collapse of the CD format and the eventual rise of streaming media, while also mapping the evolution of both pop culture and its sociopolitical climate. From the surging popularity of afrofuturism and the fall of the Twin Towers to the rise of the Black Lives Matter movement and the kneeling of Colin Kaepernick, such events all tie into how their budding bromance transformed Killer Mike and El P from solo artists in underground hip hop to pop cultural icons recognized all over the globe.

Resolutien van de Heeren Staten van Hollandt ende Westvrieslandt, *Stemmen des tijds*, 1915 **Soft Skills in Education** Jaap Scheerens, Greetje van der Werf, Hester de Boer, 2020-08-25 This book examines the global movement of putting more emphasis on students' social and emotional development in education. It provides some order in the unstructured multitude of desirable socio-emotional educational objectives and ambitions that have resulted from this movement and builds on a careful conceptual analysis. It starts out by examining the roots of the movement and discusses different emphases. Next, it makes use of instructional and psychological constructs and theories to arrive at meaningful categorizations of major domains and types of social-emotional skills. One of the key assumptions is that social and emotional attributes are malleable by means of educational interventions. The book reviews available research evidence for this assumption, taking into account psychological studies and meta-analyses. It then creates new evidence based on a new meta-analysis which concentrated on the effects of educational interventions on skills associated with the conscientiousness factor of the Big5 taxonomy. In the final chapter, the book discusses the implications for educational policy and practice, a discussion in which attention is given to political and ethical questions about the desirability of treating social and emotional attributes as educational goals.

European Data Protection: In Good Health? Serge Gutwirth, Ronald Leenes, Paul de Hert, Yves Poullet, 2012-02-23 Although Europe has a significant legal data protection

framework built up around EU Directive 95/46/EC and the Charter of Fundamental Rights the question of whether data protection and its legal framework are in good health is increasingly being posed. Advanced technologies raise fundamental issues regarding key concepts of data protection. Falling storage prices, increasing chips performance, the fact that technology is becoming increasingly embedded and ubiquitous, the convergence of technologies and other technological developments are broadening the scope and possibilities of applications rapidly. Society however is also changing, affecting the privacy and data protection landscape. The demand for free services, security, convenience, governance etc. changes the mindsets of all the stakeholders involved. Privacy is being proclaimed dead or at least worthy of dying by the captains of industry, governments and policy makers are having to manoeuvre between competing and incompatible aims and citizens and customers are considered to be indifferent. In the year in which the plans for the revision of the Data Protection Directive will be revealed, the current volume brings together a number of chapters highlighting issues, describing and discussing practices and offering conceptual analysis of core concepts within the domain of privacy and data protection. The book's first part focuses on surveillance, profiling and prediction, the second on regulation, enforcement and security and the third on some of the fundamental concepts in the area of privacy and data protection. Reading the various chapters it appears that the patient needs to be cured of quite some weak spots, illnesses and malformations. European data protection is at a turning point and the new challenges are not only accentuating the existing flaws and the anticipated difficulties but also more positively the merits and the need for strong and accurate data protection practices and rules in Europe and elsewhere.

Discovering the Dutch Emmeline Besamusca, Jaap Verheul, 2025-10-01. What do you need to know about the Netherlands? The third edition of *Discovering the Dutch* explores the urgent question of Dutch identity through a rich tapestry of themes that span culture, history, geography and society. From the legendary William of Orange to today's populist movements, from sea power to innovative water management, from pillarization to postcolonial diversity and from the timeless paintings of Rembrandt to the vibrant pulse of contemporary literature, this volume unveils the dynamic, modern and cosmopolitan society behind the iconic dikes and windmills. All chapters are accessibly written by academic scholars, explaining the many facets of Dutchness to an international audience from an inside perspective. Vivid vignettes highlight characteristic historical figures, objects and events featuring in the collective memory of the Dutch. How to understand the orange enthusiasm on King's Day? How did The Hague become the legal capital of the world? How is Anne Frank remembered? And how has the bicycle become a Dutch way of life? Painting a lively and insightful portrait of the Netherlands, this well-balanced textbook is an indispensable guide for anyone eager to discover Dutch culture and society.
