Federal Trade Commission Decisions United States. Federal Trade Commission,1980 **The Tangled Web They Weave** Ivan L. Preston,1994 Ivan L Preston recognized as a preeminent scholar of the legal dimensions of American advertising has written *The Tangled Web They Weave* for the ordinary consumer as well as for advertisers and trade regulators His frank aim is to demonstrate how advertising can better serve its audience Advertising Preston points out is full of falsity that is quite legal Indeed clever presentation of lies can make advertising entertaining to consumers and Preston provides lively examples and anecdotes of such cases The problem with falsity in advertising he argues is not so much with the bald lie as it is with deception It is in this thicket of implied claims that he shows us the dangers and indicates the need for regulatory adjustment Preston takes us down the slippery slope from the high ground of honest product claims to the unscrupulous bottom of the barrel claims that are wholly false Along the way he documents the subtle misrepresentations half and lesser truths and exploitations of our gullibility that abound in contemporary advertising The cases he describes are sometimes comic and sometimes shocking and infuriating Preston s agenda is not merely to cry Foul He sees advertising as performing not only a legitimate but an important public service It is in all our interests therefore to perfect and not just pillory As he concludes It is the time to see a way to serve society by creating a standard of personal and corporate credibility under which all advertisers regulators and consumers should want to live **The Oxford Handbook of Business Ethics** George G. Brenkert,Tom L. Beauchamp,2012-04-19 The Oxford Handbook of Business Ethics is a comprehensive treatment of the field of business ethics as seen from a philosophical approach The volume consists of 24 essays that survey the field of business ethics in a broad and accessible manner covering all major topics about the relationship between ethical theory and business ethics *Trade Regulation Reporter* ,1932 *Lying and Deception* Thomas L. Carson,2010-04-29 Thomas Carson offers the most comprehensive and up to date investigation of moral and conceptual questions about lying and deception Part I addresses conceptual questions and offers definitions of lying deception and related concepts such as withholding information keeping someone in the dark and half truths Part II deals with questions in ethical theory Carson argues that standard debates about lying and deception between act utilitarians and their critics are inconclusive because they rest on appeals to disputed moral intuitions He defends a version of the golden rule and a theory of moral reasoning His theory implies that there is a moral presumption against lying and deception that causes harm a presumption at least as strong as that endorsed by act utilitarianism He uses this theory to justify his claims about the issues he addresses in Part III deception and withholding information in sales deception in advertising bluffing in negotiations the duties of professionals to inform clients lying and deception by leaders as a pretext for fighting wars and lying and deception about history with special attention to the Holocaust and cases of distorting the historical record by telling half truths The book concludes with a qualified defence of the view that honesty is a virtue **The Federal Reporter** ,1982 *Catalog of Sears, Roebuck and*

 in the past century and yet today most men and women feel less happy than in previous generations Detailing the emerging
 science of positive psychology which seeks to understand what causes a person's sense of well being Easterbrook offers an
 alternative to our culture of crisis and complaint He makes a compelling case that optimism gratitude and acts of forgiveness
