### **Research Handbook on Intellectual Property and Climate**

**Change** Joshua D. Sarnoff, 2016-04-29. Written by a global group of leading scholars, this wide-ranging Research Handbook provides insightful analysis, useful historical perspective and a point of reference on the controversial nexus of climate change, law and policy, intellectual property law and policy, innovation, policy, technology, transfer and trade. The contributors provide a unique review of the scientific background, international treaties and political and institutional contexts of climate change and intellectual property law. They further identify critical conflicts and differences of approach between developed and developing countries. Finally, they put forward and analyse the relevant intellectual property law doctrines and policy options for funding, developing, disseminating and regulating the required technologies and their associated activities and business practices. The book will serve as a resource and reference tool for scholars, policymakers and practitioners looking to understand the issues at the interface of intellectual property and climate change.

**The Handbook of Global Science, Technology, and Innovation** Daniele Archibugi, Andrea Filippetti, 2015-09-28. The Handbook of Global Science, Technology and Innovation. This unique Handbook provides an overview of the globalization of science, technology and innovation, including global trends in the way knowledge is produced and distributed, the development of institutions and global policy. It shows how technological change and innovation are shaped by the role of emerging countries in the generation of science and technological knowledge and transnational corporations and how reforms in intellectual property rights and world trade have been affected by the increasingly international flows of knowledge, technology and innovation. The book provides an in-depth assessment of the themes and direction of science, technology, innovation and public policy in an increasingly globalized world. With contributions from an international team of leading scholars, this cutting-edge reference work introduces readers to current debates about the role of science and technology in global society and the policy responses that shape its development. Comprising 28 specially commissioned chapters, the Handbook addresses major trends in global policy, including a significant shift toward private scientific research, the change in the distribution of science and technical knowledge and a heightened awareness among policymakers of the economic and technological impact of scientific activity. Accessibly written, it provides an invaluable one-stop reference for students, social researchers, scientists and policymakers alike.

**The Breeder's Exception to Patent Rights** Viola Prifti, 2015-06-02. This book is the first to analyze the compliance of different types

of a breeder's exception to patent rights with article 30 of the Agreement on Trade Related Aspects of Intellectual Property Rights. This type of exception allows using protected biological matter for breeding new varieties of plants. The breeder's exception is widely accepted under plant variety legislation but it is not common under patent laws despite the fact that patent rights often cover plant varieties. Only few European countries have adopted such an exception. After the entry into force of the Agreement on a Unified Patent Court, the exception will be mandatory for all European Union Member states. Based on a legal and economic approach, this book offers guidance to those countries that need to incorporate a breeder's exception into their national patent systems and suggests the importance of the exception for promoting plant breeding activities.

**The Eureka Myth** Jessica Silbey, 2014-12-17. Are innovation and creativity helped or hindered by our intellectual property laws? In the two hundred plus years since the Constitution enshrined protections for those who create and innovate, we're still debating the merits of IP laws and whether or not they actually work as intended. Artists, scientists, businesses, and the lawyers who serve them, as well as the Americans who benefit from their creations, all still wonder what facilitates innovation and creativity in our digital age. And what role, if any, do our intellectual property laws play in the growth of innovation and creativity in the United States? Incentivizing the progress of science and the useful arts has been the goal of intellectual property law since our constitutional beginnings. *The Eureka Myth* cuts through the current debates and goes straight to the source: the artists and innovators themselves. Silbey makes sense of the intersections between intellectual property law and creative and innovative activity by centering on the stories told by artists, scientists, their employers, lawyers, and managers, describing how and why they create and innovate and whether or how IP law plays a role in their activities. Their employers, business partners, managers, and lawyers also describe their role in facilitating the creative and innovative work. Silbey's connections and distinctions made between the stories and statutes serve to inform present and future innovative and creative communities. Breaking new ground in its examination of the U.S. economy and cultural identity, *The Eureka Myth* draws out new and surprising conclusions about the sometimes misinterpreted relationships between creativity and intellectual property protections.

**Patent Wars** Thomas F. Cotter, 2018-06-01. In *Patent Wars*, one of America's leading patent scholars provides an accessible overview of U.S. patent law, the arguments for and against patents, and the ongoing debates over topics including the patentability of genes, software, and business methods, the impact of patents on drug prices, patent trolls, and the smartphone wars.
