At once extraordinarily wide ranging and sharply focused *Into the Stillness* offers readers several deceptively simple and informal conversations about life existence and identity in one important book Authors Gary Weber and Richard Doyle outline practical instructions on how to break free from harmful self referential thoughts while providing a path to awakening wholeness and stillness **Navigating Reading, Listening And Seeing Therapy Work For All Walks Of Life** Laurence Donelson III, 2024-04-14 *Navigating Reading Listening And Seeing Therapy Work For All Walks Of Life* **Responding to the Sacred** Michael Bernard-Donals, Kyle Jensen, 2021-03-17 With language we name and define all things and by studying our use of language rhetoricians can provide an account of these things and thus of our lived experience The concept of the sacred however raises the prospect of the existence of phenomena that transcend the human and physical and cannot be expressed fully by language The sacred thus reveals limitations of rhetoric Featuring essays by some of the foremost scholars of rhetoric working today this wide ranging collection of theoretical and methodological studies takes seriously the possibility of the sacred and the challenge it poses to rhetorical inquiry The contributors engage with religious rhetorics Jewish Jesuit Buddhist pagan as well as rationalist scientific and postmodern rhetorics studying for example divination in the Platonic tradition Thomas Hobbes's and Walter Benjamin's accounts of sacred texts the uncanny algorithms of Big Data and Hélène Cixous's sacred passages and passwords From these studies new definitions of the sacred emerge along with new rhetorical practices for engaging with the sacred This book provides insight into the relation of rhetoric and the sacred showing the capacity of rhetoric to study the ineffable but also shedding light on the boundaries between them In addition to the editors the contributors to this volume include Michelle Ballif Jean Bessette Trey Conner Richard Doyle David Frank Daniel M Gross Kevin Hamilton Cynthia Haynes Steven Mailloux James R Martel Jodie Nicotra Ned O Gorman and Brooke Rollins

Breathwork and Psychotherapy Jessica Dobb, 2025-08-26 A journey into the power of conscious breathing for therapy and everyday life Breathing is at the center of our lives yet we are only beginning to tap into its full potential as a tool for healing Conscious breathing is a powerful mechanism for transforming our physiological emotional and brain states and is the fastest way to cultivate integrated presence However its full capacity for facilitating healing personal development stronger relationships self actualization and personal and collective love is vastly unrecognized and underutilized In this book breathwork expert Jessica Dobb offers compelling reasons to integrate the power of breathwork with psychotherapy and other healing and wellness practices Here readers will find inspiration for daily breathwork practice as well as the methods case examples and actionable advice needed to incorporate breathwork into therapeutic sessions Seamlessly marrying ancient wisdom with contemporary science this insightful guide is for clinicians breathwork practitioners and anyone interested in exploring the transformative power of breath *Scale Theory* Joshua DiCaglio, 2021-11-30 A pioneering call for a new understanding of scale across the humanities How is it possible that you are simultaneously cells atoms a body quarks a component in an ecological network a moment in the thermodynamic dispersal of the sun and an element in the

gravitational whirl of galaxies In this way we routinely transform reality into things already outside of direct human experience things we hardly comprehend even as we speak of DNA climate effects toxic molecules and viruses How do we find ourselves with these disorienting layers of scale Enter Scale Theory which provides a foundational theory of scale that explains how scale works the parameters of scalar thinking and how scale refigures reality that teaches us how to think in terms of scale no matter where our interests may lie Joshua DiCaglio takes us on a fascinating journey through six thought experiments that provide clarifying yet provocative definitions for scale and new ways of thinking about classic concepts ranging from unity to identity Because our worldviews and philosophies are largely built on nonscalar experience he then takes us slowly through the ways scale challenges and reconfigures objects subjects and relations Scale Theory is in a sense nondisciplinary weaving together a dizzying array of sciences from nanoscience to ecology with discussions from the humanities from philosophy to rhetoric In the process a curious pattern emerges attempts to face the significance of scale inevitably enter terrain closer to mysticism than science Rather than dismiss this connection DiCaglio examines the reasons for it redefining mysticism in terms of scale and integrating contemplative philosophies into the discussion The result is a powerful account of the implications and challenges of scale attuned to the way scale transforms both reality and ourselves
