Noble in Reason, Infinite in Faculty A.W. Moore, 2012-09-10 In this bold and innovative new work Adrian Moore poses the question of whether it is possible for ethical thinking to be grounded in pure reason In order to understand and answer this question he takes a refreshing and challenging look at Kant's moral and religious philosophy Identifying three Kantian Themes morality freedom and religion and presenting variations on each of these themes in turn Moore concedes that there are difficulties with the Kantian view that morality can be governed by pure reason He does however defend a closely related view involving a notion of reason as socially and culturally conditioned In the course of doing this Moore considers in detail ideas at the heart of Kant's thought such as the categorical imperative free will evil hope eternal life and God He also makes creative use of the ideas in contemporary philosophy both within the analytic tradition and outside it such as thick ethical concepts forms of life and becoming those that we are Throughout the book a guiding precept is that to be rational is to make sense and that nothing is of greater value to use than making sense *Joint Volumes of Papers Presented to the Legislative Council and Legislative Assembly* New South Wales. The Human A Priori A. W. Moore, 2023-07-09 The Human A Priori is a collection of essays by A W Moore one of them previously unpublished and the rest all revised These essays are all concerned more or less directly with something ineliminably anthropocentric in our systematic pursuit of a priori sense making Part I deals with the nature scope and limits of a priori sense making in general Parts II III and IV deal with what are often thought to be the three great exemplars of the systematic pursuit of such sense making philosophy in the case of Part II ethics in the case of Part III and mathematics in the case of Part IV Much of the attention throughout is devoted to the work of other philosophers Kant and Wittgenstein feature prominently and five of the essays take the form of reviews or critical notices of recent work in philosophy But the interest is never purely exegetical

One of the lessons that emerges from the essays either in opposition to the views of these other philosophers or by invocation of their views is that we humans achieve nothing of real significance in philosophy ethics or mathematics except from a human point of view and hence that all three of these pursuits can be said to betoken what may reasonably be called the human a priori
