Keltron 95K8300KIT Thermal Printer Retrofit Kit for Keltron DMP703/4 Alarm Receivers

Quiet

Easy-to-Install

Code-Compliant

Overview

Keltron alarm receivers are known for reliable operation and long lasting performance. To meet the requirements of NFPA 72 and UL 854, Keltron alarm receivers include a printer that is capable of printing 50 events in 40 seconds with associated event logs. These impact printers are highly reliable but noisy. At the request of our customers in both base dispatch centers and remote offices, Keltron developed a quiet, reliable thermal printer that meets codes and requirements and significantly reduces the amount of ambient noise.

Installation

The Keltron thermal printer is available in an easy-to-install kit - Keltron part number 95K8300KIT - for Keltron DMP703/4 alarm receivers. It takes approximately 20 minutes to install. The power and data cable connections match the existing Keltron 100210 impact printer and the assembly slides into the housing to replace the existing impact printer deck. The upgrade requires installing new firmware chips, a plug-in cord, and a new front door over the printer cavity. Connecting the ground strap and removing the existing Keltron 95K8300 printer driver cord complete the installation. The paper catch tray is no longer necessary and the Keltron DMP703/4 alarm receiver does not need to be disassembled.

Features

The Keltron thermal printer will print the same number of lines per event as did the original impact printer as set by the programming of the system message database and is compatible with existing system printer control options. Other features include:

- Displays up to 10 lines of print at any one time
- Provides an automatic paper take-up system
- Includes system notification of paper status
- Receiver automatically resumes printing after paper is loaded and take-up button is pressed
- Supervised by receiver which notifies the operator of printer issues
- Includes automatic line feed option

The only noticeable difference between the old and new printouts is continued line printing of high priority events in DOUBLE HEIGHT instead of the lines being printed in RED.

Operation

When the automatic line feed option is enabled, the printer advances the paper four lines in one second after the printing is finished, improving visibility. When there are multiple printouts following each other or when printing lists or history, there is no advance until the end. This feature is automatically disabled for Acknowledge printouts to conserve paper. The automatic line feed option is enabled and/or disabled by CPU dispatch #2 which is continuously read so that a CPU reset is not required after the switch position is changed.
