## What Glasses Are You Wearing?

Have you ever tried to guess or imagine? They change the way things are, don't they? Well, sometimes our brains see your glasses, and we can get tripped about the way things really are. Here are some common "glasses" our brains can wear, and the ways they can take up our things differently.

**Distorting the Positive**  
When your brain doesn't "trust" the good stuff!  
If you do well on a test, you might think "I got lucky."  
If you get a compliment, you might think "Oh, that must be nice, but because that's not true!"

**Mind Reading**  
These glasses make you think you know what others are thinking. It's a game of hide-it-over-there. If a group of kids is over there laughing together, you might think "They are talking about me and laughing about my presentation!"

**Convincing**  
These glasses make you think that what you're thinking about is real. If you think a friend is talking to you, you might think "I know they're talking to me, and I will spend the rest of my life alone!"

**Black and White Thinking**  
When your brain looks only at extremes or "all or nothing". If you forget something for school, you might think "That's it, the whole day is ruined!"

**Overgeneralization**  
Thinking things are either a big conclusion. If you make a mistake, you might think "I messed up everything!"

**Personalization**  
When you think something is about you. If your mom comes home from work, you might think "She must be angry because I didn't clean my room and mess up my homework!"
