Capehart, Timothy Middelkoop, 2020-12-22 This book promotes the benefits of the development and application of energy information and control systems This wave of information technology IT and web based energy information and control systems web based EIS ECS continues to roll on with increasing speed and intensity This handbook presents recent technological advancements in the field as well as a compilation of the best information from three previous books in this area The combined thrust of this information is that the highest level functions of the building and facility automation system are delivered by a web based EIS ECS system that provides energy management facility management overall facility operational management and ties in with the enterprise resource management system for the entire facility or the group of facilities being managed **Advances in Carbon Management Technologies** Subhas K. Sikdar, Frank Princiotta, 2021-01-31 Volume 2 of *Advances in Carbon Management Technologies* has 21 chapters It presents the introductory chapter again for framing the challenges that confront the proposed solutions discussed in this volume Section 4 presents various ways biomass and biomass wastes can be manipulated to provide a low carbon footprint of the generation of power heat and co products and of recovery and reuse of biomass wastes for beneficial purposes Section 5 provides potential carbon management solutions in urban and manufacturing environments This section also provides state of the art of battery technologies for the transportation sector The chapters in section 6 deals with electricity and the grid and how decarbonization can be practiced in the electricity sector The overall topic of advances in carbon management is too broad to be covered in a book of this size It was not intended to cover every possible aspect that is relevant to the topic Attempts were made however to highlight the most important issues of decarbonization from technological viewpoints Over the years carbon intensity of products and processes has decreased but the proportion of energy derived from fossil fuels has been stubbornly stuck at about 80% This has occurred despite very rapid development of renewable fuels because at the same time the use of fossil fuels has also increased Thus the challenges are truly daunting It is hoped that the technology choices provided here will show the myriad ways that solutions will evolve While policy

decisions are the driving forces for technology development the book was not designed to cover policy solutions
