of the Architecture Forum and to the evolution of TOGAF to ensure that others make a fair contribution in return
So much for legal necessities I turn now to the additional information and resources that I hope the reader will find of interest
The Development of TOGAF
TOGAF has come a long way since its inception in 1994 at the instigation of The Open Group's User Council as it then was representatives of the computer user community among The Open Group membership
The original motivations for TOGAF were very much as Tony and Col have expounded so eloquently in the early chapters of this book
The original development of TOGAF was based on the Technical Architecture Framework for Information Management TAFIM developed by the U S Department of Defense
The DoD gave The Open Group explicit permission and encouragement to create TOGAF by building on the TAFIM which itself represented hundreds of person years of development effort and millions of dollars of U S government investment
Starting from this sound foundation the members of The Open Group's Architecture Forum have developed successive versions of TOGAF over the years and published them on The Open Group's public Web site
TOGAF Related Resources
The Open Group's Architecture Forum portal at <http://www.opengroup.org/architecture> provides a way in to the information sources scribed in the remainder of this Foreword
