Wood, Alvaro Cuervo-Cazurra, Pei Sun, Ilya Okhmatovskiy, Anna Grosman, 2022-08-01 There has been a major revival of interest in State Capitalism what it is where it is found and why it is seemingly becoming more ubiquitous As

a concept it has evolved from radical critiques of the Soviet Union to being deployed by neo liberals to describe market reforms deemed imperfect to settle into a middle ground as a pragmatic way to describe the state assuming a role as an active economic agent in addition to its regulatory social and security functions The latter is the central focus of this book although due attention is accorded to the origins of state capitalism and how it has changed over the years as well as contemporary ways in which state capitalism may be theorized This economic agency may assume direct forms for example via state owned enterprises However it may also be indirect for example actively serving private interests through promoting insider firms who may occupy monopolistic market positions and perform outsourced state functions In turn this leads to raising salient governance questions The latter may encompass agency tensions between public ownership and political or even private interest control it may also include issues of transparency and monitoring Although state capitalism has often been depicted as the preserve of states in the global south be they developmental or predatory many forms of state capitalism are visible in mature economies be they liberal or coordinated and this is not always associated with superior governance arrangements indeed this is an area where clear and easy divisions between the developing or emerging world and the developed or mature world may increasingly be breaking down This volume brings together the accounts of leading experts from around the world it is explicitly multi disciplinary and both consolidates the existing knowledge base and provides new novel and counter intuitive insights

This book presents the results of a collective and original empirical investigation of the institutional systems underlying the capitalisms

that are coming to the fore in developing nations While varieties of industrialized countries capitalisms are extensively scrutinized those of developing countries capitalisms are far less documented By implementing a unified and original comparative approach based on the institutional complementarity theory the different contributors of the book find evidence for the originality and heterogeneity of the forms of capitalism to be observed in developing countries This text analyses capitalist systems as clusters of sectoral institutions and regulations identifying differences between these clusters in a large sample of emerging and developing countries Rougier and Combarrous bring together contributions answering the following questions What are these clusters of institutions underlying emerging capitalisms Are there common or specific patterns of institutional clustering across countries and what are the main characteristics of the varieties of capitalism they shape What are their main long term determinants Are there specific patterns of economic outcome associated with these clusters Can different forms of institutional complementarity be observed How can we analyse institutional reform from this perspective
