In recent years historians across the world have become increasingly interested in transnational and global approaches to the past However the debates surrounding this new border crossing movement have remained limited in scope as theoretical exchanges on the tasks responsibilities and potentials of global history have been largely confined to national or regional academic communities In this groundbreaking book Dominic Sachsenmaier sets out to redress this imbalance by offering a series of new perspectives on the global and local flows sociologies of knowledge and hierarchies that are an intrinsic part of historical practice Taking the United States Germany and China as his main case studies he reflects upon the character of different approaches to global history as well as their social political and cultural contexts He argues that this new global trend in historiography needs to be supported by a corresponding increase in transnational dialogue cooperation and exchange

Using The Human Record, Sources of Global History, Fourth Edition, Volumes I and II Alfred J. Andrea, 2001. *Discipline Problems* Tadashi Dozono, 2024-05-07. Angel, a Black tenth grader at a New York City public school, self-identifies as a nerd and likes to learn. But she's troubled that her history classes leave out events like the genocide and dispossession of Indigenous people in the Americas, presenting a sugar-coated image of the United States that is at odds with her everyday experience. The history I learned in school is simpler, she says. The world I live in is a lot more complex. Angel, like every student interviewed in *Discipline Problems*, has been identified by teachers as a troublemaker: a student whose behavior disrupts classroom norms and interferes with instruction. But her critiques of the curriculum she's taught speak to her curiosity and insight: crucial foundations for understanding history. Like many students who have been marginalized by systemic racism in American schools, she exposes the shortcomings of her classrooms' academic environments by challenging both the content and the methods of her education. All too often these challenges are framed as troublemaking, and the students are disciplined for acting out instead of being rewarded for their intellectual engagement. Tadashi Dozono, a professor of education and former high school social studies teacher, takes seriously the often overlooked critiques that students of color who get labeled as troublemakers direct toward their high school history curriculum. He reinterprets troublemaking, usually cast as a behavioral deficit, as an intellectual asset and form of reasoning that challenges the disciplining reason of classrooms where whiteness is valued over the histories and knowledge of people of

color Dozono shows how what are traditionally framed as discipline problems can be seen through a different lens as responses to educational practices that marginalize non white students Discipline Problems reveals how students of color seek out alternate avenues for understanding their world and imagines a pedagogy that champions the curiosity intellect and knowledge of marginalized learners
