Issues and Perspectives in Landscape Ecology John A. Wiens, Michael R. Moss, 2005-04-14 A series of essays which

address a wide array of past current and future issues in landscape ecology **Landscape Ecology in Asian Cultures**

Sun-Kee Hong, Jianguo Wu, Jae-Eun Kim, Nobukazu Nakagoshi, 2010-12-25 Cultural landscapes are a product of the interactions between humans and natural settings They are landscapes and seascapes that are shaped by human history and land use Socioeconomic processes especially but also environmental changes and natural disturbances are some of the forces that make up landscape dynamics To understand and manage such complex landscapes interdisciplinary and transdisciplinary approaches are necessary emphasizing the integration of natural and social sciences and considering multiple landscape functions The spatial patterns of Asian landscapes are strongly related to human activities and their impacts Anthropogenic patterns and processes have created numerous traditional cultural landscapes throughout the region and understanding them requires indigenous knowledge Cultural landscape ecology from a uniquely Asian perspective is explored in this book as are the management of landscapes and land use policies Human dominated landscapes with long traditions such as those described herein provide useful information for all ecologists not only in Asia to better understand the human environmental relationship and landscape sustainability **History of Landscape Ecology in the United States**

Gary W. Barrett, Terry L. Barrett, Jianguo Wu, 2015-06-23 This book describes the emergence of landscape ecology its current status as a new integrative science and how distinguished scholars in the field of landscape ecology view the future regarding new challenges and career opportunities Over the past thirty years landscape ecology has utilized development in technology and methodology e g satellites GIS and systems technologists to monitor large temporal spatial scale events and phenomena These events include changes in vegetative cover and composition due to both natural disturbance and human cause changes that have academic economic political and social manifestations There is little doubt due to the temporal spatial scale of this integrative science that scholars in fields of study ranging from anthropology to urban ecology will desire to compare their fields with landscape ecology during this intellectually and technologically fertile time History of Landscape Ecology in the United States brings to light the vital role that landscape ecologists will play in the future as the human population continues to increase and fragment the natural environment Landscape ecology is known as a synthesized intersection of disciplines but new theories concepts and principles have emerged that form the foundation of a new transdiscipline **Applied Landscape Ecology**

Francisco Castro Rego, Stephen C. Bunting, Eva Kristina Strand, Paulo Godinho-Ferreira, 2019-02-04 An insightful guide to the concepts and practices of modern landscape ecology Elements of geography conservation biology soil science and other disciplines factor into landscape ecology s rich analyses of the ecological and environmental forces at play across different terrains With its unique organism oriented approach to the subject Applied Landscape Ecology considers the effects of ecological processes upon particular species and places its findings within the context of larger scale concerns Students researchers and practitioners alike will find this a rewarding and instructive read that offers practical and detailed information on the latest methods and technologies used in the field

today This essential resource Takes an interdisciplinary approach to landscape ecology Examines the subject within the contexts of specific organisms Covers cutting edge technologies and methods Represents a collaboration between an international team of landscape ecology experts Comes with 25 exercises that are freely available from the book companion site Whether new to the practice or an established ecologist anyone with an interest in this exciting and developing field should have a copy of Applied Landscape Ecology at their disposal Landscape Ecology for Sustainable Environment and Culture Bojie Fu, Bruce Jones K, 2013-03-26 Climate change and the pressures of escalating human demands on the environment have had increasing impacts on landscapes across the world In this book world class scholars discuss current and pressing issues regarding the landscape landscape ecology social and economic development and adaptive management Topics include the interaction between landscapes and ecological processes landscape modeling the application of landscape ecology in understanding cultural landscapes biodiversity climate change landscape services landscape planning and adaptive management to provide a comprehensive view that allows readers to form their own opinions Professor Bojie Fu is an Academician of Chinese Academy of Sciences and Chair of scientific committee at the Research Center for Eco Environmental Sciences Chinese Academy of Sciences Beijing China Professor K Bruce Jones is the Executive Director for Earth and Ecosystem Sciences Division at Desert Research Institute University of Nevada Las Vegas USA *Current Trends in Landscape Research* Lothar Mueller, Frank Eulenstein, 2019-11-13 This book presents definitions key concepts and projects in landscape research and related areas such as landscape science and landscape ecology addressing and characterising the international role status challenges future and tools of landscape research in the globalised world of the 21st century The book brings together views on landscapes from leading international teams and emerging authors from different scientific disciplines and regions of the globe It describes approaches for achieving sustainability and for handling the multifunctionality of landscapes and includes international case studies demonstrating the great potential of landscape research to provide partial sustainable solutions while developing cultural landscapes and protecting semi natural landscapes It is intended for scientists from various disciplines as well as informed readers dealing with landscape policies planning involvement management stewardship and conservation *Perspectives on Nature Conservation* John Tiefenbacher, 2012-02-29 *Perspectives on Nature Conservation* demonstrates the diversity of information and viewpoints that are critical for appreciating the gaps and weaknesses in local regional and hemispheric ecologies and also for understanding the limitations and barriers to accomplishing critical nature conservation projects The book is organized to emphasize the linkages between the geographic foci of conservation projects and the biological substances that we conceptualize as nature through original research The reader moves through perspectives of diminishing spatial scales from smaller to larger landscapes or larger portions of the Earth to learn that the range of factors that promote or prevent conservation through the application of scholarship and academic concepts change with the space in question The book reflects disciplinary diversity
