**Global Values and International Trade Law** Csongor István Nagy,2021-12-26 Exploring the relationship and interaction between economic interests and normative non trade values this book argues that the emergence and development of non trade values is based on a complex dialectic interaction between selfish economic interests and normative values and examines how their structural interdependence has given rise to a remarkable evolution in international trade Conceiving this relationship as an intricate dialectic one that is neither purely value driven nor purely economic interest driven it addresses the emergence function and role of non trade values in international trade with a synthesizing approach and explores the results of their interaction in international economic intercourse Approaching the non trade issues of trade in a holistic manner the book demonstrates that trade can operate smoothly only if it is framed by an architecture of normative value standards and international trade liberalization has reached the level where further development calls for cooperation also in fields that at first glance may appear to be non trade in nature **Annual Review of Comparative and International Education 2018** Alexander W.
