Guide Specifications For Seismic Isolation Design:

Guide Specifications for Seismic Isolation Design, 2010 This edition is based on the work of NCHRP project 20.7 task 262 and updates the 2nd 1999 edition. **Guide Specifications for Seismic Isolation Design** American Association of State Highway and Transportation Officials, American Association of State Highway and Transportation Officials.

Subcommittee on Bridges and Structures, 1999 AASHTO Guide Specifications for LRFD Seismic Bridge Design, 2009 Covers seismic design for typical bridge types and applies to non critical and non essential bridges. Approved as an alternate to the seismic provisions in the AASHTO LRFD Bridge Design Specifications. Differs from the current procedures in the LRFD Specifications in the use of displacement based design procedures instead of the traditional force based R Factor method. Includes detailed guidance and commentary on earthquake resisting elements and systems, global design strategies, demand modeling, capacity calculation and liquefaction effects. Capacity design procedures underpin the Guide Specifications methodology. Includes prescriptive detailing for plastic hinging regions and design requirements for capacity protection of those elements that should not experience damage. *Summary of Evaluation Findings for the Testing of Seismic Isolation and Energy Dissipating Devices* Highway Innovative Technology Evaluation Center (U.S.), 1999-01-01 Prepared by the Highway Innovative Technology Evaluation Center, HITEC, a CERF Service Center. This report summarizes the results of an evaluation that was designed to test the performance of 11 seismic isolators and dampers. The devices were tested for stability response during earthquake simulations and fatigue and weathering effects. Recent Developments In Bridge Engineering K.M. Mahmoud, 2003-01-01 This book contains a selected number of papers that were presented at the Second New York City Bridge Conference organized by the Bridge Engineering Association.
