Poverty Strategies in Asia John Weiss,Haider Khan,2006-01-01 the volume makes interesting reading The language of the text is indeed lucid and the organization of the materials could not have been better Arup Mitra The Developing Economies This is an important book making a convincing case that structural elements are of crucial importance in filtering the impact of growth on poverty A successful development strategy needs to address these structural elements at the country level and modify them in order to

take greater advantage of the potential benefits of globalization in reducing poverty Erik Thorbecke Cornell University US This volume makes an important contribution to our understanding of the complex relationship between economic growth and poverty reduction The focus on assessing the impact of specific poverty reduction interventions at the disaggregated case study level marks an important and welcome departure from the standard approach to research in this area researchers and practitioners working in the field of poverty reduction and development in Asia and beyond will find much to interest them in this stimulating and informative volume Colin Kirkpatrick University of Manchester UK Poverty Strategies in Asia is an examination of a wide range of measures aimed at reducing poverty in the region It is widely recognized that while high and sustained economic growth is critical for poverty reduction there are other policy interventions that may also be significant in a growth plus approach to poverty reduction This volume brings together a series of case studies on the poverty impact of alternative interventions in a broad range of Asian economies The measures examined within the book cover trade liberalization both in general and in a specific market infrastructure investment particularly in roads population policies cash transfers microfinance employment guarantee programs and contract farming The countries covered include the Philippines Lao PDR Pakistan India and Thailand While the results illustrated by the contributors are mixed they demonstrate the potential for further progress in poverty reduction This latest joint publication by the ADBI and Edward Elgar Publishing will be warmly welcomed by scholars and researchers of Asian studies and development Professional economists within international and bilateral development agencies and policymakers will also find much to engage them

The Impact of IMF-Supported Programs on FDI in Low-income Countries Mr.Ali J Al-Sadiq,2015-07-16 It is common for IMF supported adjustment programs with low income member countries LICs to project that they will facilitate FDI inflows The main objective of this paper is to empirically examine this hypothesis Using an unbalanced panel dataset for 73 low income countries over the period 1980 2012 and two different econometric methods that address the selection bias problem the empirical results robustly show that participating in IMF supported program is associated with a significant increase in FDI inflows

Oil Abundance and Economic Growth Elkhani Richard Sadik-Zada,2016-11-07 This book deals with the role of oil abundance in economic growth The major theoretical contribution of the analysis is the transformation of the rentier state theory into the language of mathematical economics The mathematical formalization of the rentier state theory enables a more sophisticated analytical tool for the assessment of the role of nonrenewable resource revenues in economic growth and institutional dynamics The embedding of the elements of a rentier state into the labor surplus economy framework leads to grave consequences as reflected in the quantitative part of the survey The augmented labor surplus economy model shows that both the political economy and the purely economic causes of the resource curse can have similar effects on the resource allocation in the affected nation Hence it is not possible to use econometric tools to compartmentalize the effects of the Dutch disease and those explanations based upon political economy This is the reason why one can only estimate the

total growth effects of oil revenues Besides cross country panel estimations a case study of Azerbaijan provides additional insights into petroleum based economic development These international panel and country specific estimations are partly based on the two sector model of economic growth In the case of Azerbaijan a vector error correction model which is based upon the behavioral model of the equilibrium exchange rate is applied to detect the Dutch disease tendencies
