which underpin beliefs and practices when working and playing with babies and show clearly the need for all day nursery practitioners to be more politically aware and able to critique current policy directives for their own sakes and those of the babies in their care and their families For those in baby rooms who feel their role is purely functional and that they are there to provide just care for the babies this book will make them think again Janet Moyles Professor Emerita Anglia Ruskin University UK In their brilliant book Drs Gooch and Powell elevate baby care and education by presenting it in all its complexities challenging common societal perceptions that dismiss it as easy and thus requiring of no special skill education or support of its workforce Showing tremendous respect for practitioners the authors articulate the emotional and physical difficulties of working day to day in birth to three settings and the intellectual demands inherent in implementing relational pedagogies with babies families colleagues and the community at large The authors foreground the lived experiences of practitioners with relevant research and theory making fully transparent the nature of their critical interpretations a tremendous contribution to the field The Baby Room is a must read for students scholars teacher educators and policy makers and all who care about the rights of our youngest global citizens an essential handbook for those interested in joining forces with the authors to help reframe the prevailing baby teacher discourses swirling around and about and all of us who want to get serious about addressing the attendant need to fully support the professional development and well being of those who care for and educate our babies Professor Mary McMullen School of Education Indiana University USA This scholarly book will never gather dust on a shelf It is highly readable and helpful for lead practitioners in taking forward their work in very practical ways It will also inform policy makers and future planning about how to give babies the best start in life a doubly good book which it has been a treat to read Professor Tina Bruce CBE University of Roehampton UK Babies need quality care Knowledge about the very early stage of life from conception through early developmental milestones can be seen as a factual base for work with babies and families there are plenty of manuals about early development and maternal or parental role There is a rich seam of scientific papers from for example psychology biology and medicine aimed principally at others in those fields In the field of early childhood education and care manuals also exist however high level academic publications have been few it is as if thinking about children s education and care and the impact of the people around them begins at three and indeed here there is a proliferation of work The messages from science cannot be ignored young human beings need the highest quality of human companionship if they are to flourish in the ways of which they are capable The Baby Room is a stunning book Drawing from their experience of a research and development project with Baby Room practitioners and advisory staff Kathy Gooch and Sacha Powell have created a powerful scholarly challenging highly readable and well evidenced book focused on the out of home care of babies From it we can learn so much more about the importance of having well informed motivated and articulate people working with babies How to be with babies and how to care the importance of talk the importance of being both valued and challenged are some of the key messages their writing

offers to adults who work professionally and on a daily basis with babies and toddlers but also for those who employ support and advise them This book provides the reader with important and essential knowledge about why experiences in babyhood matter for the rest of life and more than that it provokes thinking about how babies their families and the practitioners who work with them are placed by society by our politic and by the babycare industry What the authors describe as the constant binding thread of the participants narratives show us what needs to be done who can take responsibility and how collectively we need to shift not only babyroom practices but policy training opportunities working conditions and not least attitudes This book speaks to all with a passion for providing well for our youngest children let the reader in turn use it to open the conversation locally and nationally about what matters for babies Aline Wendy Dunlop Emeritus Professor University of Strathclyde UK This fascinating book does not argue for or against baby rooms but opens up issues and shares the voices of baby room practitioners traditionally the least qualified and most poorly paid staff in the early years sector Goouch and Powell have listened respectfully to these voices as well as challenging and questioning what they mean for babies settings and society Their research is important democratic and unsettling and should be required reading for everyone who has ever wondered about what is best for our babies Helen Moylett Early Years Consultant and writer
