Scale Kirk Williams, 2022-05-01 How much revenue growth did your agency see last year How many new employees were added to your team How fast have you grown in the past four years Get a few digital agency owners together and these questions will all be asked within the first 30 seconds of the meet and greet if not sooner But what if these are the wrong questions on which to be focused What if the way you think about growth personal fulfillment and how you lead your agency doesn't need to center around revenue or employee headcount growth If you are getting exhausted by the endless emphasis on revenue or employee growth as the assumed primary goal of every agency owner then this book is for you It is a clarion call for agency owners to stop chasing unicorn like growth and instead focus on serving their clients employees friends family neighbors and thus make an indelible imprint on the world This book is not anti growth but it does offer an alternate path for the overworked agency owner *The Brain, Education, and the Competitive Edge* Geoffrey Caine, Renate Nummela

Caine, 2001-09-10 Everyone agrees that improving education is vital but people disagree on what to do Business parents politicians the media and educators all voice strong and conflicting opinions The public needs to have the issues clarified and to see a path that will work There ARE ways to raise standards but most current education reform is moving in precisely the

Positive Feedback in Natural Systems Donald L. DeAngelis, Wilfried M. Post, Curtis C. Travis, 2012-12-06 Cybernetics a science concerned with understanding how systems are regulated has reflected the preoccupations of the century in which it was born Regulation is important in twentieth century society where both machines and social organizations are complex Cybernetics focused on and became primarily associated with the homeostasis or stability of system behavior and with the negative feedbacks that stabilize systems It paid less attention to the processes opposite to negative feedback the positive feedback processes that act to change systems We attempt to redress the balance here by illustrating the enormous importance of positive feedbacks in natural systems In an article in the American Scientist in 1963 Maruyama called for increased attention to this topic noting that processes of change could occur when a deviation in anyone component of the system caused deviations in other components that acted back on the first component to reinforce or amplify the initial deviation The deviation amplification is the result of positive feedback among system components Maruyama demonstrated by numerous examples that the neglect of such processes was unjustified and suggested that a new branch of cybernetics the second cybernetics be devoted to their

The Fourth Wave Herman Maynard,Susan E. Mehrtens,1996-08-31 Applying the concept of historical waves originally propounded by Alvin Toffler in *The Third Wave* Herman Maynard and Susan Mehrtens look toward the next century and foresee a fourth wave an era of integration and responsibility far beyond Toffler s revolutionary description of third wave postindustrial society Whether we attain this stage of global well being however will depend on how well our business institutions adapt and change *The Fourth Wave* examines the ways business has changed in the second and third waves and must continue to change in the fourth The changes concern the basics how an institution is organized how it defines wealth how it relates to surrounding communities how it responds to environmental needs and how it takes part in the political process Maynard and Mehrtens foresee a radically different future in which business principles concern for the environment personal integrity and spiritual values are integrated The authors also demonstrate the need for a new kind of leadership managers and CEOs who embrace an attitude of global stewardship who define their assets as ideas information creativity and vision and who strive for seamless boundaries between work and private lives for all employees *Open Source*

Leadership L. Gadman,C.
