Argentar,Katherine A. N.

Gillies,Rubenstein Maureen M.,Brian R. Wise,2024-09-10 Students need literacy support to think read and write in every subject including math Part of the Every Teacher Is a Literacy Teacher series this book emphasizes the importance that the PLC at Work process has in supporting learners who struggle with literacy Grades 6 12 teachers will strengthen reading capabilities with practical reading and writing strategies specifically designed for mathematics instruction This book will help secondary math teachers Learn how to incorporate writing instruction into mathematics curriculum and why it s important Collaborate with their colleagues using end of chapter prompts that encourage PLC cooperation Implement immediate intervention strategies for struggling students to shorten learning gaps Strategize their mathematics instruction to effectively address both struggling students and those at proficient levels Implement formative and summative assessments and look at feedback Contents Studying Virtual Math Teams Gerry Stahl,2010-05-03 Studying Virtual Math Teams centers on detailed empirical studies of how students in small online groups make sense of math issues and how they solve problems by making meaning together These studies are woven together with materials that describe the online environment and pedagogical orientation as well as reflections on the theoretical implications of the findings in the studies The nature of group cognition and shared meaning making in collaborative learning is a foundational research issue in CSCL More generally the theme of sense making is a central topic in information science While many authors allude to these topics few have provided this kind of detailed analysis of the mechanisms of intersubjective meaning making This book presents a coherent research agenda that has been pursued by the author and his research group The book opens with descriptions of the project and its methodology as well as situating this research in the past and present context of the CSCL research field The core research team then presents five concrete analyses of group interactions in different phases of the Virtual Math Teams research project These chapters are followed by several studies by international collaborators discussing the group discourse the software affordances and alternative representations of the interaction all using data from the VMT project The concluding chapters address implications for the theory of group cognition and for the methodology of the learning sciences In addition to substantial introductory and concluding chapters this important new book includes analyses based upon the author s previous research thereby providing smooth continuity and an engaging flow that follows the progression of the

research The VMT project has dual goals a to provide a source of experience and data for practical and theoretical explorations of group knowledge building and b to develop an effective online environment and educational service for collaborative learning of mathematics Studying Virtual Math Teams reflects these twin orientations reviewing the intertwined aims and development of a rigorous science of small group cognition and a Web 2 0 educational math service It documents the kinds of interactional methods that small groups use to explore math issues and provides a glimpse into the potential of online interaction to promote productive math discourse
