experiences and inner lives of working class people Jensen a community and counseling psychologist provides an in depth psychologically informed examination of how class in America is created and re created through culture with an emphasis on how working and middle class cultures differ and conflict This book is unique in its claim that working class cultures have positive qualities that serve to keep members within them and that can haunt those who leave them behind Through both autobiographical reflections on her dual citizenship in the working class and middle class and the life stories of students clients and relatives Jensen brings into focus the clash between the realities of working class life and middle class expectations for working class people Focusing on education she finds that at every point in their personal development and educational history working class children are misunderstood ignored or disrespected by middle class teachers and administrators Education while often hailed as a way to cross classes brings with it its own set of conflicts and internal struggles These problems can lead to a divided self resulting in alienation and suffering for the upwardly mobile student Jensen suggests how to increase awareness of the value of working class cultures to a truly inclusive American society at personal professional and societal levels

TWENTY-FIRST CENTURY DYNAMICS OF MULTICULTURALISM Martin Guevara Urbina, 2014-09-19 In the twenty first century few studies have delineated the U S multiculturalism story beyond black and white to include the truths and realities of other Americans over time resulting in highly skewed academic publications While the white experience and to a lesser extent the black experience has been well documented the brown experience for instance has been neglected minimized or excluded from the pages of history Clearly there has been a great need for researchers to examine the multiple intertwining forces of historical and contemporary movements defining shaping and governing the everyday experience of America s people In the face of centuries of manipulation exploitation oppression and sometimes brutal violence blacks browns reds yellows and others are still here fighting not only for ethnic and racial tolerance but also for equality justice respect and human dignity In fact despite the long legacy of hate violence and oppression against America s most disadvantaged communities particularly undocumented people the minority population will continue to grow and with pressing demographic shifts ethnic and racial minorities will soon become the new face of America In delineating the dynamics of multiculturalism over the years contributing authors illustrate that the United States is nowhere near a post racial society and thus we must prioritize equality justice and multiculturalism if the U S is in fact going to have a balanced system Globally the United States must actively engage in significant and positive social transformation in the new millennium if the U S is going to be situated
