**Transforming Early Head Start Home Visiting** Bridget A. Walsh, Jennifer A. Mortensen, 2019-10-29 Research on home visiting shows that Early Head Start (EHS) home-based programs benefit from additional training and resources that streamline philosophy and content. This text is the first to outline linkages between FLE and EHS home visiting. It explores a qualitative study of FLE integrated in a current EHS home-based program and application of FLE methodology to home visiting topics. This approach will influence professional practice and provide a foundation for developing evidence-based home visiting practices. Online content accompanies the text with videos demonstrating the FLE approach in action and discussion questions to encourage engagement with and understanding of the core material.

Behavior in this view is embedded within what is essentially a dynamic system of relations extending deep within individuals. Thorough and engaging, this handbook explores the impact of this research on what is now known about psychological development from birth to biological maturity, and it highlights the extent to which the most cutting-edge developmental science reflects a new kind of intellectual synthesis, one that reveals how cultural, social, cognitive, neural, and molecular processes work together to yield human behavior and changes in human behavior. With insightful contributions from more than 50 of the world's leading developmental scientists, these two volumes will serve as an influential and informed text for students and as an authoritative desk reference for years to come.
