Early Childhood Assessment National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Board on Children, Youth, and Families, Committee on Developmental Outcomes and Assessments for Young Children, 2008-12-21 The assessment of young children's development and learning has recently taken on new importance Private and government organizations are developing programs to enhance the school readiness of all young children especially children from economically disadvantaged homes and communities and children with special needs Well planned and effective assessment can inform teaching and program improvement and contribute to better outcomes for children This book affirms that assessments can make crucial contributions to the improvement of children's well being but only if they are well designed implemented effectively developed in the context of systematic planning and are interpreted and used appropriately Otherwise assessment of children and programs can have negative consequences for both The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments

Group Care for Infants, Toddlers, and Twos Deborah J. Norris, Diane M. Horn, 2019-10-23 This volume extends the knowledge base supporting research informed child care for infants and toddlers while simultaneously highlighting areas of study ripe for future research The authors demonstrate from a systems perspective that the experiences and outcomes of very young children in child care are influenced by characteristics of and interactions between the children adults and settings Varying methodological approaches as well as the utilization of newer data collection instruments inform

the field's understanding of current practices and procedures while offering guidance for future programming and policy. In turn, the chapters highlight a plethora of open questions and a need for a new generation of research to support the field of infant toddler care. Future challenges are evident in the recognition of the inadequate nature of our current measures of child outcomes and classroom processes; the field's unmet promise to incorporate interdisciplinary perspectives; and the need for newer methodological designs that blend the strengths of quantitative and qualitative approaches. These issues are important given the growing demand for infant toddler care and the increasing recognition of the unique role of this age period in serving as the foundation for all later development. This book was originally published as a special issue of *Early Education and Development*.

For Our Babies J. Ronald Lally, 2015-04-25

For the last forty years J. Ronald Lally has worked with state and federal agencies to improve services for infants and toddlers in the United States and abroad. In this new book, Lally paints a stark picture of how our babies have been forced to shoulder the fallout of massive societal changes over the past 60 years—changes that have resulted in less access to their parents, longer time spent in child care, and substandard child care and services. *For Our Babies* features the resonant voices of American parents speaking of their hopes, worries, and frustrations living in a country with too few parental and child supports. It describes American parents' general lack of awareness about how little they receive from their state and federal governments compared to parents living in other countries. This important book includes crucial testimony from developmental psychologists, child care providers, health and mental health professionals, economists, specialists in brain development, and early learning educators about how policy and practices must change in the United States if parents are to raise children who will become healthy, productive members of society. This book is part of the *For Our Babies* initiative. Visit the website which includes an author blog at www.forourbabies.org.

J. Ronald Lally is the co-director of the Center for Child and Family Studies at WestEd, an educational research and development laboratory in San Francisco. He created the Program for Infant and Toddler Care and is one of the founders of Zero to Three National Center for Infants, Toddlers, and Families. Lally is right: Our economy and our society will be stronger if public policies do more to help raise healthy babies. I applaud his tireless efforts to increase national awareness about the critical importance of improving early childhood development for all families.

U.S. Congressman George Miller (D-CA-11) Dr. Lally's book sensitively captures the tension in knowing that infants at birth are both full of unlimited developmental potential and at the same time desperately dependent on their surroundings. And thankfully, it is filled with ways to act on his informed and urgent plea for action to change policy and practice.

Carol Brunson Day, President, Brunson Phillips Day, Inc. Professor Lally draws on a lifetime of working with infants to review and synthesize the research about the importance of the first 3 years of life and what babies need, especially from their relationships with parents and caregivers, to thrive developmentally and socially. He then paints a disturbing picture of how present policies are failing young children: the invisible neglect. This book is a must-read for all who care about young children and their future.

Frank Oberklaid, Director

Centre for Community Child Health Royal Children's Hospital Melbourne This is a clarion and moving call on behalf of our most vulnerable and valuable citizens our amazing babies It gathers together the freshest and broadest knowledge of what they need to flourish and contrasts this to the myriad ways our policies and practices consistently fail them For Our Babies is an energizing enlightening and wholly loving book Jeree Pawl Clinical Psychologist Board of Directors Zero to Three Lally and others including some of the economists cited in this book have shown how investments in quality early education and preventive healthcare will more than pay for themselves when children reach adulthood This book is a starting place for urgently needed dialogue that will finally lead to action From the Foreword by T Berry Brazelton and Joshua Sparrow Harvard University
