Infecting The Treatment Being An Hiv Positive Analyst:

Infecting the Treatment Gilbert Cole, 2013-04-15 The revelation of being HIV positive continues to be a discourse fraught with meaning In *Infecting the Treatment Being an HIV Positive Analyst* Gilbert Cole offers an intimate and deeply insightful examination of disclosure of his HIV seropositivity on his analytic sense of self and on his clinical work with patients Cole begins his journey of discovery by meditating on the meanings that being HIV positive have had for him and by situating these personal meanings within the multiple meanings of HIV seropositivity generated by our culture leading to a clinical discussion of the pros and cons of disclosure to one's patients What begins as a consideration of disclosure of an ostensibly medical fact opens to an exploration of the broader problematic of disclosure in the context of questions of sameness and difference of dependence and autonomy and of the ethical ground of psychoanalytic practice He illuminates these issues by circling back to his own predicament which took the form of an apparent conflict between his self image as a psychoanalytic therapist committed to a psychoanalytic treatment approach and aspects of his self experience that seemed uncomfortably dissonant with this identity and this commitment He approached resolution of this conflict when he became able to use his HIV seropositivity as a metaphor for aspects of the treatment process Comprising Cole's personal engagement of the issues inherent in being an HIV positive analyst his report of clinical work attendant to disclosure of his condition and a research project compiling the experiences of other HIV positive analysts *Infecting the Treatment* is an intimate and deeply insightful examination of the impact of one analyst's disclosure of HIV seropositivity on his analytic sense of self With admirable candor and uncommon thoughtfulness Cole shows how the analyst's disclosure of information of the most meaningful sort may deepen and even transform the therapeutic dialogue

Uncoupling Convention Ann D'Ercole, Jack Drescher, 2013-06-17 What does it mean to be member of a gay lesbian couple or family The contributors to *Uncoupling Convention Psychoanalytic Approaches to Same Sex Couples and Families* address this question by drawing on two cultural movements of the twentieth century psychoanalysis and the gay lesbian civil rights movement Taken together these traditions provide a framework for understanding and providing psychotherapeutic assistance to gay and lesbian patients who present with troubled relationships The contributors to this volume espouse a clinical focus that supplants the heterosexual perspectives of traditional psychoanalysis with new narratives about family life Drawing on cultural feminist gay lesbian and queer studies they illustrate how concepts of gender and sexuality are routinely informed by unproven heterosexist assumptions both conscious and unconscious By examining the changing developmental needs and family dynamics of gay and lesbian families the contributors broaden our very understanding of what a family is They illustrate how contrasting cultural constructions of homosexuality and family life play out in same sex couples They delineate the multiple realities of gender subjectivity both in children and in their gay parents They ponder how technology is shaping reproductive experiences as lesbians become part of the biomedical system And they explore recurrent themes of feeling different and

ashamed including the shameful secrecy surrounding same sex couples financial matters In uncoupling conventions the contributors are effectively coupling post Freudian psychoanalysis with the insights of queer theory and the critical edge of contemporary cultural studies The result is a framework for addressing the relational and family related challenges of gay and lesbian patients that ranges far beyond traditional approaches and will benefit analytic couples and family therapists alike
