Information Age Six Networks That Changed Our World:

Björnstorps-utställningen 1 - 2 juni 1957, 1957 *Information Age* Science Museum (Great Britain), 2014 Explores the development of information and communications networks from the nineteenth century to the present day *The Oxford Handbook of American Documentary* Joshua Glick, Visiting Associate Professor of Film & Electronic Arts Joshua Glick, Patricia Aufderheide, University Professor in the School of Communication Patricia Aufderheide, 2025 Joshua Glick and Patricia Aufderheide Over the past twenty years documentaries have taken on an increasingly central place in American public life One measure of their importance is their commercial value Major media companies have moved aggressively to monetize documentary exploiting the form's relatively low budgets compared to fiction **Museums and the History of Computing** Simone Natale, Petrina Foti, Ross Parry, 2024-07-26 *Museums and the History of Computing* examines the critical role that cultural organizations such as museums and galleries play in shaping digital heritage the cultural heritage surrounding computer technology Focusing on digital technologies as objects and practices that museums collect exhibit and preserve for the future this book highlights how and why museums play a crucial role in preserving the rich heritage of the digital world constructing powerful narratives that help make it relevant to the public It demonstrates that the museum can be a powerful means of safeguarding and interpreting ephemeral and continually changing digital technology offering new pathways for rethinking the very meaning of digital objects and practices in contemporary societies It provides practices and strategies for the preservation and exhibition of computing artifacts and ways to accommodate and respond to narratives about histories of computing that circulate in the public arena Bringing together leading museum and university researchers and practitioners and mobilizing cross cutting debates and approaches in areas such as museum studies cultural heritage history of technology anthropology and media studies this book challenges us to think critically about what digital is when examined not only as a tool but as a cultural object deserving of attention and a place within the museum *Museums and the History of Computing* is for museum studies students and researchers as well as museum practitioners especially those with an interest in digital technology and heritage It will be of interest to researchers and students interested in histories of computing and digital media and in digital media studies **History in Practice** Ludmilla Jordanova, 2019-08-22 Exploring the breadth and complexities of history as a field of study *History in Practice* demystifies what historians actually do and the tasks they take on This study written by one of the most acute practitioners in the field examines not only the academic discipline but also engages with the use of historical ideas in the wider world The new edition features A new chapter on history in the digital age covering the use of information technology in historical practice Extended coverage of the relationships between history and other disciplines Fresh material on current trends in the practice of history Over 35 new illustrations spread throughout the book drawn from around the world This book is essential reading for all students seeking an understanding of history as a discipline *Digitisation* Gertraud Koch, 2017-07-14 In recent years digital technologies have become pervasive in academic

and everyday life This comprehensive volume covers a wide range of concepts for studying the new cultural dynamics that are evident as a result of digitisation It considers how the cultural changes triggered by digitisation processes can be approached empirically The chapters include carefully chosen examples and help readers from disciplines such as Anthropology Sociology Media Studies and Science Technology Studies to grasp digitisation theoretically as well as methodologically

Collecting and Exhibiting Computer-Based Technology Petrina Foti, 2018-11-05 Computer technology has transformed modern society yet curators wishing to reflect those changes face difficult challenges in terms of both collecting and exhibiting *Collecting and Exhibiting Computer Based Technology* examines how curators at the history and technology museums of the Smithsonian Institution have met these challenges Focusing on the curatorial process the book explores the ways in which curators at the institution have approached the accession and display of technological artifacts Such collections often have comparatively few precedents and can pose unique dilemmas In analysing the Smithsonian s approach Foti takes in diverse collection case studies ranging from DNA analyzers to Herbie Hancock s music synthesizers from iPods to born digital photographs from the laptop used during the filming of the television program *Sex and the City* to Stanley the self driving car Using her proposed model of expert curation she synthesizes her findings into a more universal framework for understanding the curatorial methods associated with computer technology and reflects on what it means to be a curator in a postdigital world *Collecting and Exhibiting Computer Based Technology* offers a detailed analysis of curatorial practice in a relatively new field that is set to grow exponentially It will be useful reading for curators scholars and students alike

Digitalization and the Field of African Studies Mirjam de Bruijn, 2019-02-25 Urbanization in Africa also means rapid technological change At the turn of the 21st century mobile telephony appeared in urban Africa Ten years later it covered large parts of rural Africa and thanks to the smartphone became the main access to the internet This development is part of technological transformations in digitalization that are supposed to bridge the urban and the rural and will make their borders blurred They do so through the creation of economic opportunities the flow of information and by influencing peoples definition of self belonging and citizenship These changes are met with huge optimism and the message of Information and Communications Technologies for Development ICT4D for Africa has been one of glory and revolution Practice however reveals other sides Increasingly academic publications show that we are facing a new form of digital divide in which Africa is again at the margins These technological transformations influence the relation between urban and rural Africa and between Africa and the World and hence the field of African Studies both in its objects as well as in its forms of knowledge production and in the formulation of the problems we should study In this lecture Mirjam de Bruijn reflects on two decades of research experience in West and Central Africa and discusses how for her the field has changed The author was forced to decolonize her thinking even further and to enter into co creation in knowledge production How can these lessons be translated into a form of critical knowledge production and how does the study of technological change inform the redefinition of African

Today roughly 2 billion people use the internet and its applications have flourished in number and importance This volume will examine the growth and geography of the internet from a political economy perspective Its central motivation is to illustrate that cyberspace does not exist in some aspatial void but is deeply rooted in national and local political and cultural contexts Toward that end it will invoke a few major theorists of cyberspace but apply their perspectives in terms that are accessible to readers with no familiarity with them Beyond summaries of the infrastructure that makes the internet possible and global distributions of users it delves into issues such as the digital divide to emphasize the inequalities that accompany the growth of cyberspace It also addresses internet censorship e commerce and e government issues that have received remarkably little scholarly attention particularly from a spatial perspective Throughout it demonstrates that in cyberspace place matters so that no comprehensive understanding of the internet can be achieved without considering how it is embedded within and in turn changes local institutional and political contexts Thus the book rebuts simplistic death of distance views or those that assert there is or can be a one size fits all cookie cutter model of the internet applicable to all times and places

Mapping the Transnational World Emanuel Deutschmann, 2022-01-25 A study of the structure growth and future of transnational human travel and communication Increasingly people travel and communicate across borders Yet we still know little about the overall structure of this transnational world Is it really a fully globalized world in which everything is linked as popular catchphrases like global village suggest Through a sweeping comparative analysis of eight types of mobility and communication among countries worldwide from migration and tourism to Facebook friendships and phone calls Mapping the Transnational World demonstrates that our behavior is actually regionalized not globalized Emanuel Deutschmann shows that transnational activity within world regions is not so much the outcome of political cultural or economic factors but is driven primarily by geographic distance He explains that the spatial structure of transnational human activity follows a simple mathematical function the power law a pattern that also fits the movements of many other animal species on the planet Moreover this pattern remained extremely stable during the five decades studied 1960 to 2010 Unveiling proximity induced regionalism as a major feature of planet scale networks of transnational human activity Deutschmann provides a crucial corrective to several fields of research Revealing why a truly global society is unlikely to emerge Mapping the Transnational World highlights the essential role of interaction beyond borders on a planet that remains spatially fragmented

Europe and World Society Chris Rumford, Didem Buhari-Gulmez, 2017-10-02 Europe and World Society offers a distinctive

critical approach to understanding European transformations exploring both the progress and limitations of integration on various key policy areas such as agricultural policy education reform migration and external relations as well as the relationship between European regionalism and globalization Due to its innovative theoretical framework based on macro perspectives including World Polity Theory developed by Stanford sociologist John W Meyer this collection contributes to both the recent sociological turn in European studies and to the constructivist critiques of rational choice accounts of modern Europe At a time when the European integration project has been severely challenged by multiple economic political and social crises this book offers a timely global perspective that sheds light on the dynamism and multiplicity of the actors discourses and processes which underlie contemporary Europe The book s distinctive global approach allows it to move the debate beyond state and EU centrism and establish the missing link between Europe and its global context This book was published as a special issue of the Journal of Contemporary European Studies

Human Resource Management David G. Collings, Geoffrey Wood, Leslie T. Szamosi, 2018-08-15 Despite over three decades of debate around the nature of human resource management HRM its intellectual boundaries and its application in practice the field continues to be dogged by a number of theoretical and practical limitations Written by an international team of respected scholars this updated textbook adopts a critical perspective to examine the core management function of HRM in all its complexity including its darker sides Human Resource Management A Critical Approach opens with a critique of the very concept of HRM tracing its development over time and then systematically analyses the context of HRM practice of HRM and international perspectives on HRM New chapters commissioned for this second edition look at HRM and the issues of diversity migration global supply chains and economic crisis This textbook is essential reading for advanced and inquisitive students of HRM and for HRM professionals looking to deepen their understanding of the complexities of their field

Teaching in a Networked Classroom Jonathan Savage, Clive McGoun, 2015-06-05 The pace of technological change has made the immediate and long term future difficult if not impossible to predict Teachers are forced to imagine the world they are preparing their students to live in In this situation creativity becomes a vital resource for enabling uncertain futures to be embraced and an important attribute for students to have both for their learning and their employability in the future In this book the authors argue that creativity is a social and collaborative process that can be enhanced through online and digital technologies Filled with case studies and practical tasks it shows teachers how they can develop an approach to teaching and learning with digital technologies that is inherently social collaborative and creative Including case studies and practical examples of projects and lessons throughout the chapters cover Learning in a networked society An examination of sharing practices and how knowledge can be shared more effectively Potential pitfalls of virtual learning environments and public social networking sites Using digital media to plan schemes of work and lessons How to facilitate meaningful collaboration and discussion through digital media Creating online environments to enable students to share their understandings and learning Bringing together key ideas about

creativity collaborative learning and ICT in the classroom this timely book will be an invaluable resource for all teachers
