## **Mastering Excel Named Ranges Offset And Dynamic Charts:**

**Mastering Excel** Mark Moore, 2017-05-22 This lesson focuses on many seemingly unrelated topics but then combines them in unexpected ways to create something greater than the sum of its parts First we review the concept of Named Ranges What are they How can they help in Excel Then we cover the OFFSET function It is truly one of the most powerful flexible and mostly unused functions in Excel It is unused because it does take some getting used to OFFSET doesn't work like the rest of the Excel functions However we will go through this function in detail here Then we move on to using Forms in Excel Forms give users familiar ways to interact with an Excel worksheet much like a form on the web And finally we combine Named Ranges OFFSET Forms and Charts to create animated charts Excel users will be able to click the worksheet and see the charts animate in real time There are no macros no programming involved just a creative way of combining existing Excel functionality This lesson covers a lot of ground To help everyone understand and follow along with the exercises I have made available a sample workbook Follow the link in the book and you can receive the workbook to work on alongside the text The sample workbook has a bonus extra dynamic chart not covered in the book
