The State of Agricultural Commodity Markets Food and Agriculture Organization of the United Nations,2018-04-18 Global trade in agricultural and food products has grown rapidly in recent decades with countries becoming more engaged in this trade whether as exporters or importers This trend is expected to continue over the coming decades As a consequence trade will play an increasingly important role in influencing the extent and nature of food security across all regions of the globe The challenge has therefore become one of ensuring that the expansion of agricultural trade works for and not against the elimination of hunger food insecurity and malnutrition This edition of The State of Agricultural Commodity Markets aims to reduce the current polarization of views on the impacts of agricultural trade on food security and on the manner in which agricultural trade should be governed to ensure that increased trade openness is beneficial to all countries By providing evidence and clarity on a range of topics the report seeks to contribute to a more informed debate on policy choices and to identify required improvements in the policy processes within which these choices are made The Handbook of Globalisation, Second Edition Jonathan Michie,2011-01-01 Acclaim for the first edition Even those who dislike the word globalisation cannot avoid using it This remarkable book clarifies the concept of globalisation and the ways in which it should be used It is an invaluable guide to the economic and social processes of the 21st century Daniele Archibugi Italian National Research Council Italy Admirably edited With a wealth of applied detail the contributors visit all the interesting questions in international political economy Ciaran Driver University of London UK This Handbook brings together a stunning range of writing on a subject which has tended to be wrapped in mystery and controversy From the opening chapters that debate the newness of globalisation to the chapters that analyse the hegemony of neo liberalism this book weaves together the most up to date and challenging academic work Vishnu Padayachee University of Natal Durban South Africa Globalisation is a ubiquitous buzzword But what does it really mean and what are its implications for human well being The Handbook of Globalisation pulls together current work from a sterling cast of innovative thinkers on these questions It is no surprise that

one finds penetrating insights and innovative policy approaches on nearly every page Robert Pollin University of Massachusetts Amherst US Globalisation is an issue that has been high on the research agenda for several years spawning a vast and at times unwieldy literature A concept often ill defined it has generated a plethora of unresolved and fiercely contested questions the nature of which depends on which side of the ideological divide one stands The 2008 global credit crunch which in 2009 created the first global recession since the 1930s demonstrated that the capitalism unleashed model of globalisation which had been promoted from the 1980s onwards was both damaging and unsustainable With contributions from the leading commentators in the field and an over arching introduction from the editor the concerns of this updated and revised handbook are two fold Firstly to redefine the concept of globalisation and dispel the haze that surrounds it through a systematic and thorough examination of the debate Secondly to advance the frontiers of current critical thinking on the role and impact of globalisation on the winners and losers in the process and on the implications for society the economy and governance Offering a genuinely inter disciplinary perspective this Handbook represents the definitive guide to what is an all pervasive issue It should be on the bookshelves of all postgraduate and advanced undergraduate students in economics business international studies and related fields as well as scholars and policymakers with an interest in the global economy and in the functioning of an increasingly globalised world

2015 -16 El estado de los

mercados de productos básicos agrícolas Food and Agriculture Organization of the United Nations, 2018-04-18 El comercio mundial de productos agrícolas y alimentarios ha crecido rápidamente en las últimas décadas con el aumento de los países en este comercio como exportadores o importadores. Se prevé que esta tendencia continúe durante los próximos decenios. En consecuencia, el comercio desempeña un papel cada vez más importante al influir en el alcance y la naturaleza de la seguridad alimentaria en todas las regiones del planeta. El desafío por lo tanto consiste en asegurarse de que la expansión del comercio agrícola contribuya y no perjudique a la eliminación del hambre, la inseguridad alimentaria y la malnutrición. El objetivo de la presente edición de El estado de los mercados de productos básicos agrícolas es de reducir la actual polarización de las opiniones sobre los efectos del comercio agrícola en la seguridad alimentaria y la manera en que este debería gobernarse para conseguir que una mayor apertura al comercio beneficie a todos los países. Al ofrecer datos y aclaraciones sobre una variedad de temas, el informe pretende contribuir a un debate más informado sobre las opciones en materia de políticas, así como señalar las mejoras necesarias en los procesos normativos en el contexto de los cuales se realizan esas elecciones.

Globalisation, New and Emerging Technologies, and Sustainable Development Jesper Lindgaard Christensen, Birgitte Gregersen, Jacob Rubæk Holm, Edward Lorenz, 2021-05-03 This book explores the capacity of the Danish innovation system to respond to key societal challenges including the green imperative of achieving growth with environmental sustainability and the need to adapt to new and possibly disruptive changes in technology often referred to as the Fourth Industrial Revolution. The book is divided into four main parts. The first describes the evolving characteristics of the Danish system of research and innovation with special attention to the role of policy at the national and regional levels. The second part focuses on interorganisational relations including the position of Danish firms in national and global value chains. The third part examines changes in labour markets and in the educational and training system and it considers the impact of new technologies including robotics and artificial intelligence on employment and skills. The fourth part turns to issues of climate change and environmental sustainability including an assessment of the Danish economy's success in meeting the challenges of the UN Sustainable Development Goals. The book will be of particular interest to small countries of which the Danish innovation system is representative but it also appeals more broadly to an audience interested in innovation systems and policies to support economic development.
