Freedman,Anabel L. Jensen,Marsha C. Rideout,1998 Self Science is a curriculum and a process for teaching social and emotional skills It is a flexible framework where students do activities or experiments that lead to discussion and learning The students own experiences concerns and questions drive the content so the process works with people from all kinds of backgrounds all ages an all levels Self Science fuses cognitive and affective learning students build feeling and thinking skills at the same time Rather than telling children what not to do Self Science provides multiple options of what to do It helps children become more aware of themselves and make more conscious decisions about the ways they think feel and act independently and interdependently Nationally and internationally parents and teachers are increasingly concerned about school culture and emotional intelligence competencies Issues of exclusion violence depression and under achievement are all addressed within this preventative comprehensive program Self Science so named because emotional intelligence grows from the study of ourselves and our relationships is one of the few comprehensive developmental and research based curricula for creating a school wide culture of emotional intelligence The Self Science program creates a fundamental shift in the structure of the school toward collaboration inclusion and humanism Part of the power of Self Science is its flexibility Once a facilitator understands how a lesson flows she or he can easily adapt any current topics other exercises and even academic subject matter into the lessons In addition Self Science can be taught as a stand alone class or folded into existing programs such as class meetings advisory life skills or community service
