Routes to the Information Revolution Alexander Arbel, 2019-03-18 This book is a precise and comprehensive history of the digital computer It is the first collection of available information about the digital computer beginning with the philosophical and logical advancements in the early 20th century that led to it The book explores the histories and stories of

the computer tracing its roots and routes It examines and analyzes commonly accepted views on the digital computer and its development and offers clearer and more accurate alternatives to them Its approach though dealing with the introduction and development of the digital computer is applicable to the history of technology in general The central question considered here is why were the automatic digital program controlled calculating devices developed simultaneously in Germany the USA and the UK during the period 1935 1945 Astonishingly the technologies ideas calculating means and calculating techniques existed and were available long before the development of the automatic digital program controlled calculating device However only during the period 1935 1945 did they materialize Ideas that may be viewed as attempts to develop this type of device began early in the modern era Babbage 1834 and Ludgate 1909 took the first steps and constructed devices that may be viewed as something like computers Nevertheless the concrete fulfillment and practical use of these ideas was accomplished only in the period of 1935 1945 by a group of developers who acted in ignorance of what was done before This book opens with a detailed discussion of these processes

Invention: The Master-key to Progress Rear-Admiral Bradley Allen Fiske, 2020-09-28 *Labor and Laborers of the Loom* Gail Fowler Mohanty, 2012-11-12 Labor and Laborers of the Loom Mechanization and Handloom Weavers 1780 1840 develops several themes important to understanding the social cultural and economic implications of industrialization The examination of these issues within a population of extra factory workers distinguishes this study The volume centers on the rapid growth of handloom weaving in response to the introduction of water powered spinning This change is viewed from the perspectives of mechanics technological limitations characteristics of weaving skills income and cost In the works of Duncan Bythell and Norman Murray the displacement of British and Scottish hand weavers loomed large and the silence of American handloom weavers in similar circumstances was deafening This study reflects the differences between the three culture by centering not on displacement but on survival Persistence is closely tied to the gradual nature of technological change The contrasts between independent commercial artisans and outwork weavers are striking Displacement occurs but only among artisans devoting their time to independent workshop weaving Alternatively outwork weavers adapted to changing markets and survived The design and development of spinning and weaving device is stressed as are the roles of economic conditions management organization size of firms political implications and social factors contribute to the impact of technological change on outwork and craft weavers

Human Progress Amid Resistance to Change Joseph E. Pluta, 2011-04 In building their profession around carefully selected interpretations of the work of Adam Smith Alfred Marshall and others mainstream economists have embraced such concepts as the invisible hand equilibrium consumer rationality the marginal productivity theory the inevitability of diminishing returns and the fiction of pure competition In contrast the evolutionary economics of Thorstein Veblen and Clarence Ayres challenges all of these concept as unproven and capable of telling us little or nothing about the actual operation of the economy Using the evolutionary framework Human Progress Amid Resistance to Change argues that all

cultures since prehistory have faced two opposing forces technology including human knowledge and institutions rooted in ceremonialism The former is dynamic forward looking accepting of change cumulative one discovery builds on another and the major cause of human progress The latter is static and consists of all customs traditions superstitions rituals ceremonies taboos and past binding religious beliefs that resist change The book illustrates in detail how these competing forces have interacted throughout the history of the human race and how mainstream economics fails to grasp the significance of their combined effects
