Infrastructure For The Built Environment Global Procurement Strategies:

Infrastructure for the Built Environment: Global Procurement Strategies Rodney Howes, Herbert Robinson, 2006-08-14 Throughout the world there is a growing demand for high quality public services to support socio economic development Infrastructure is central to improving the level of public services and the quality of the built environment But in key areas such as transport energy water healthcare education and communications public resources are not sufficient to keep pace with this demand As the public sector struggles to keep up the private sector is increasingly involved in the procurement of economic and social infrastructure Until now procurement strategies have often concentrated on the mechanisms and the bricks and mortar without a thorough analysis of the processes and their implications for services The result is that all too often infrastructure projects are implemented in an ad hoc and fragmented way In this ground breaking book Rodney Howes and Herbert Robinson provide a holistic approach to infrastructure provision that facilitates infrastructure delivery aimed at continuously improving the level and quality of services Critical issues of policy and strategy implementation and operational aspects are examined within the context of sustainability By emphasising the importance of procuring infrastructure within an overall national or regional development policy and strategy the authors have demonstrated the importance of linking investment and resource decisions to local social economic and environmental needs With each chapter carefully written to reflect part of the infrastructure delivery chain and illustrated with practical examples and case studies from around the world this book offers a new blueprint for infrastructure investment and resource management

Design Economics for the Built Environment Herbert Robinson, Barry Symonds, Barry Gilbertson, Ben Ilozor, 2015-03-26 The drive towards environmentally friendly buildings and infrastructure has led to a growing interest in providing design solutions underpinned by the core principles of sustainability to balance economic social and environmental factors *Design Economics for the Built Environment* Impact of sustainability on project evaluation presents new directions reflecting the need to recognise the impact of climate change and the importance of sustainability in project evaluation The aim is to provide a new approach to understanding design economics in the context of the changing policy environment legislative and regulatory framework and increasing economic environmental and social pressure as result of the sustainability agenda The book follows a structured approach from theories and principles in the earlier chapters to the practical applications and emerging techniques focusing on value and social economic and environmental considerations in making design decisions It starts with the policy context building on various theories and principles such as capital cost value of design and resource based theories the new rules of measurement NRM to explore cost planning the relationship between height and costs key socio economic and environmental variables for design appraisal eco cost value ratio EVR whole life theory and the treatment of carbon emission as external costs productivity and efficiency fiscal drivers and legal framework for carbon reduction procurement and allocation of risks in contracts Case studies practical examples and frameworks

throughout reinforce theories and principles and relate them to current practice The book is essential reading for postgraduate students in architecture building and quantity surveying and is also a valuable resource for academics consultants and policy makers in the built environment

Infrastructure Investments in Developing Economies Giang Dang, Low Sui Pheng, 2014-10-18 This book aims to provide knowledge on how infrastructure is planned and built in a typical developing country and what key variables are there in the system limiting the efficient use of public investments in infrastructure The book begins with a comprehensive literature review on construction and economic development and trade and economic development The focus of the book is on the case of Vietnam with lessons drawn for other developing economies The book employs the mixed use of data to provide a stronger basis for analysis and interpretation of related government policies Based on the research findings the book recommends significant capacity building work for Vietnam to develop capacities that would remove constraints on the efficient use of public investments in infrastructure The general principles of significant capacity building work which are useful for policy implications are introduced in the book Analysts academics public and private communities in developing countries can adopt the research findings as guiding principles to bring about changes in their current use of public investments in infrastructure thus supporting their trade and economic growth in the long term

An Integrated Infrastructure Delivery Model for Developing Economies Rembuluwani Netshiswinzhe, Clinton Aigbavboa, Wellington Didibhuku Thwala, 2023-08-29 This book explores the attributes of an integrated model for infrastructure delivery as a means to achieve high impact investing sustainable growth and development in a developing economy An Integrated Infrastructure Delivery Model for Developing Economies Planning and Delivery Management Attributes is premised on the understanding that one of the most significant barriers to efficient and effective infrastructure delivery is the nature and extent of fragmentation in the ways in which infrastructure projects are planned designed and delivered Using a Delphi method the research presented in this book examines the infrastructure delivery models and practices that have been employed in South Africa and other developing countries and in doing so presents eight attributes for integrated infrastructure delivery These are i developing a common vision for the community ii stakeholder participation iii integrated project development and scoping iv access to planning information v cross sectoral planning vi integrated infrastructure master plans vii statutory and regulatory compliance and viii integrated contractual frameworks The book presents a practical model that can serve as a guide and a manual for project planning and development to achieve integrated infrastructure delivery in developing economies The proposed model should serve as a framework to inform future planning and programming of infrastructure projects within the public sector space Furthermore the application of the model will help resolve the problems of fragmentation and lack of coordination in how infrastructure projects are planned and implemented This book will be beneficial to infrastructure practitioners policymakers researchers and academics who pursue best practice models to improve the delivery and management of infrastructure

Housing in the Aftermath of the Fast Track Land Reform Programme in Zimbabwe Lovemore Chipungu, Hangwelani Hope Magidimisha, 2020-12-10 This book delves into the Fast Track Land Reform Programme FTLRP in Zimbabwe to provide insight into how it facilitated the delivery of housing for low income

urban households It highlights the politics of land reforms and the power of community engagement in housing development in urban areas Prior to the FTLRP the Zimbabwean governments had never embraced popular modes of housing production as key factors in urban development In the area of low income housing informal housing schemes have always been treated with apathy and indifference This left the conventional mode of housing production to be the only legitimate means to house low income households despite its shortcomings However the onset of the FTLRP in 2000 resulted in homeless urban households grasping the opportunity to invade farms for housing development Through the lenses of Marxism and Neoliberalism this book analyses housing schemes that emerged and the overall impact of the FTLRP on housing and land delivery in Harare This analysis is based on empirical evidence obtained from key informants and household surveys conducted in Harare The authors argue that the FTLRP provided a platform for innovativeness by households supported by the unpronounced national urban vision and prowess of the political leadership Hence the success of these housing schemes can be measured by acquisition of land which guarantees households access to the city However some of these housing schemes pose challenges key among them being lack of infrastructure The book concludes by presenting a new model for effective delivery of land and housing for the urban poor This is envisaged as a useful policy tool for urban planners housing experts land economists urban and regional geographers as well as sociologists political scientists and social workers engaged in public administration of land and housing
