Park, Jefferson Pooley, 2008. Strictly speaking, James Carey wrote there is no history of mass communication research. This volume is a long overdue response to Carey's comment about the field's ignorance of its own past. The collection includes essays of historiographical self-scrutiny as well as new histories that trace the field's institutional evolution and cross-pollination with other academic disciplines. The volume treats the remembered past of mass communication research as crucial terrain where boundaries are marked off and futures plotted. The collection intended for scholars and advanced graduate students is an essential compass for the field.

The Handbook of Global Interventions in Communication Theory Yoshitaka Miike, Jing Yin, 2022-03-10. Moving beyond the U.S. Eurocentric paradigm of communication theory, this handbook broadens the intellectual horizons of the discipline by highlighting underrepresented, especially non-Western theorists and theories and identifies key issues and challenges for future scholarship. Showcasing diverse perspectives, the handbook facilitates active engagement in different cultural traditions and theoretical orientations that are global in scope but local in effect. It begins by exploring past efforts to diversify the field, continuing on to examine theoretical concepts, models, and principles rooted in local cumulative wisdom. It does not limit itself to the mass interpersonal communication divide but rather seeks to frame theory as global and inclusive in scope. The book is intended for communication researchers and advanced students with relevance to scholars with an interest in theory within information science, library science, social and cross-cultural psychology, multicultural education, social justice, and social ethics, international relations, development studies, and political science.

Mass Communication Theories Melvin L. DeFleur, Margaret H. DeFleur, 2022-05-02. The second edition of this innovative textbook provides a comprehensive overview of mass communication theories as well as their origins and empirical supports in psychology, sociology, political science, and philosophy. Each chapter presents a specific theory, describing its basic structure in simple formal terms and providing an accessible summary of the research studies and scholarly writings from which it developed. It breaks each complex theory down into five or six interlinked basic propositions, making them easily digestible for students. This new edition includes up-to-date research, improved coverage of all theories presented, expanded treatments of theories such as cultivation theory, the spiral of silence, and framing, contemporary and social media examples, chapter discussion questions, and informative charts and figures. This textbook serves as an accessible core text for undergraduate and graduate Mass Communication, Communication Theory, and Communication and Society courses.
