Mastermind Maria Konnikova, 2013-01-03 The New York Times bestselling guide to thinking like literature's greatest detective Steven Pinker meets Sir Arthur Conan Doyle Boston Globe by the author of The Confidence Game No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes But is his extraordinary intellect merely a gift of fiction or can we learn to cultivate these abilities ourselves to improve our lives at work and at home We can says psychologist and journalist Maria Konnikova and in Mastermind she shows us how Beginning with the brain attic Holmes's metaphor for how we store information and organize knowledge Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights Drawing on twenty first century neuroscience and psychology Mastermind explores Holmes's unique methods of ever present mindfulness astute observation and logical deduction In doing so it shows how each of us with some self awareness and a little practice can employ these same methods to sharpen our perceptions solve difficult problems and enhance our creative powers For Holmes aficionados and casual readers alike Konnikova reveals how the world's most keen eyed detective can serve as an unparalleled guide to upgrading the mind The Confidence Game Maria Konnikova, 2017-01-10 It's a startling and disconcerting read that should make you think twice every time a friend of a friend offers you the opportunity of a lifetime Erik Larson 1 New York Times bestselling author of Dead Wake and bestselling author of Devil in the White City Think you can't get conned Think again The New York Times bestselling author of Mastermind How to Think Like Sherlock Holmes explains how to spot the con before they spot you An excellent study of Con Artists stories the human need to believe Neil Gaiman via Twitter A compelling investigation into the minds motives and methods of con artists and the people who fall for their cons over and over again While cheats and swindlers may be a dime a dozen true conmen the Bernie Madoffs the Jim Bakkers the Lance Armstrongs are elegant outsized personalities artists of persuasion and exploiters of trust How do they do it Why are they successful And what keeps us falling for it over and over again These are the questions that journalist and psychologist Maria Konnikova tackles in her mesmerizing new book From multimillion dollar Ponzi schemes to small time frauds Konnikova pulls together a selection of fascinating stories to demonstrate what all cons share in common drawing on scientific dramatic and psychological perspectives Insightful and gripping the book brings readers into the world of the con examining the relationship between artist and victim The Confidence Game asks not only why we believe con artists but also examines the very act of believing and how our sense of truth can be manipulated by those around us **How Sherlock Pulled the Trick** Brian McCuskey, 2021-06-01 A masterful combination of literary study and author biography How Sherlock Pulled the Trick guides us through the parallel careers of two inseparable men Sherlock Holmes and his creator Sir Arthur Conan Doyle Reconsidering Holmes in light of Doyle's well known belief in Victorian spiritualism Brian McCuskey argues that the so called scientific detective follows the same circular logic along the same trail of questionable evidence that led Doyle to the sance room Holmes's first case A Study in Scarlet

was published in 1887 when natural scientists and religious apologists were hotly debating their differences in the London press In this environment Doyle became convinced that spiritualism as a universal faith based on material evidence resolved the conflict between science and religion The character of Holmes with his infallible logic was Doyle s good faith solution to the cultural conflicts of his day Yet this solution has evolved into a new problem Sherlock Holmes now authorizes the pseudoscience that corrupts our public sphere defying logic revising history and promoting conspiracy theories As this book demonstrates wearing a deerstalker does not make you a mastermind more likely it marks you as a crackpot Fascinating and highly readable How Sherlock Pulled the Trick returns the iconic Holmes to his mystical origins

Defending Realism Guido Bonino,Greg Jesson,Javier Cumpa,2014-12-11 The essays in this volume first presented at an international conference held at the University of Urbino Italy in 2011 explore the different senses of realism arguing both for and against its distinctive theses and considering these senses from a historical point of view The first sense is the metaphysical thesis that whatever exists does so and has the properties it has independently of whether it is the object of a person s thought or perception The second sense of realism is epistemological wherein realism claims that in some cases it is possible to know the world as it exists in and of itself A third sense which has become known as ontological realism states that universals exist as well as individuals The essays collected here make new contributions to these fundamental philosophical issues which have largely defined western analytic philosophy from Plato and Aristotle to the present day

Grammar Dialectic and Rhetoric can unite progressive and traditionalist institutions teachers politicians and parents in the common pursuit of providing a great education for our children in the 21st century Education policy and practice is a battleground Traditionalists argue for the teaching of a privileged type of hard knowledge and deride soft skills Progressives deride learning about great works of the past preferring 21c skills 21st century skills such as creativity and critical thinking Whilst looking for a school for his daughter the author became frustrated by schools inability to value knowledge as well as creativity foster discipline alongside free thinking and value citizenship alongside independent learning Drawing from his work as a creative teacher Robinson finds inspiration in the Arts and the need to nurture learners with the ability to deal with the uncertainties of our age Named one of Book Authority s best education books of all time Diagnosis Pat Croskerry,Karen Cosby,Mark L. Graber,Hardeep Singh,2017-09-19 Despite diagnosis being the key feature of a physician s clinical performance this is the first book that deals specifically with the topic In recent years however considerable interest has been shown in this area and significant developments have occurred in two main areas a an awareness and increasing understanding of the critical role of clinical decision making in the process of diagnosis and of the multiple factors that impact it and b a similar appreciation of the role of the healthcare system in supporting clinicians in their efforts to make accurate diagnoses Although medicine has seen major gains in knowledge and technology over the last few decades there is a consensus that the diagnostic failure rate remains in the order of 10 15% This book provides an overview of the major issues in this area in particular focusing on where the diagnostic process fails and where improvements might be made

Normalizing Mental Illness and Neurodiversity in Entertainment Media Malynnda Johnson,Christopher J. Olson,2021-04-19 This volume examines the shift toward positive and more accurate portrayals of mental illness in entertainment media asking where these succeed and considering where more needs to be done With studies that identify and analyze the characters viewpoints and experiences of mental illness across film and television it considers the messages conveyed about mental illness and reflects on how the different texts reflect reinforce or challenge sociocultural notions regarding mental illness Presenting chapters that explore a range of texts from film and television covering a variety of mental health conditions including autism post traumatic stress disorder PTSD depression and more this book will appeal to scholars of sociology cultural and media studies and mental health The Biological Mind Alan Jasanoff,2018-03-13 A pioneering neuroscientist argues that we are more than our brains To many the brain is the seat of personal identity and autonomy But the way we talk about the brain is often rooted more in mystical conceptions of the soul than in scientific fact This blinds us to the physical realities of mental function We ignore bodily influences on our psychology from chemicals in the blood to bacteria in the gut and overlook the ways that the environment affects our behavior via factors varying from subconscious sights and sounds to the weather As a result we alternately overestimate our capacity for free will or equate brains to inorganic machines like computers But a brain is neither a soul nor an electrical network it is a bodily organ and it

cannot be separated from its surroundings Our selves aren't just inside our heads they're spread throughout our bodies and beyond Only once we come to terms with this can we grasp the true nature of our humanity **Rethinking**

Communication in Social Business Craig E. Mattson, 2018-08-31 Social entrepreneurship increasingly assumes a position of strength in the dynamic milieu of late modern democratic societies A plethora of companies have now arisen everything from mighty social enterprises like Warby Parker and TOMS to tiny outfits like Clean Slate and Bright Endeavors whose business focused approach to social problems is not merely additive but integral to their missions These companies respond not only to a felt proliferation of humanitarian and environmental predicaments but also to enormous shifts in public feelings and technological sensibilities These predicaments make social entrepreneurs urgently needed and remarkably complicated But if social entrepreneurs deal with that complexity with a business as usual approach to making the world better imitating for example corporate social responsibility initiatives by transnational companies they will lose their vital distinctiveness and efficacy Drawing on a transdisciplinary perspective close rhetorical analysis and qualitative interviews with social entrepreneurs this book argues that one good way to keep social business disruptive is to rethink how organizations model their communication Instead of assuming a conventional theory of communication neatly organized around the relations of senders and receivers social entrepreneurship should enact a performative model of communication in which messaging and action are affectively woven This book offers suggestions for making this performative model sustainably disruptive in relation to questions that pester social entrepreneurs how to tell the company story how to raise awareness how to address complex audiences and how to solve problems *The Presentation Book for Senior Managers* Jay Surti, 2017-05-25 This book is a comprehensive guide covering all the essential ingredients for delivering presentations that engage and persuade a professional audience The author covers everything from planning and structuring content to delivering with confidence Content is designed for senior leaders and managers in professional organizations who need to present to a wide variety of audiences ranging from team meetings to conference speeches The focus of the book is on engaging with the audience in a way that informs entertains and persuades It is written by a former city lawyer who now helps MBA candidates master presentations someone who understands the pitfalls of talking at audiences and providing little value Bursting the Big Data Bubble Jay Liebowitz, 2014-07-25 As we get caught up in the quagmire of Big Data and analytics it remains critically important to be able to reflect and apply insights experience and intuition to your decision making process In fact a recent research study at Tel Aviv University found that executives who relied on their intuition were 90 percent accurate in their decisions *Bursting the Big Data Bubble The Case for Intuition Based Decision Making* focuses on this intuition based decision making The book does not discount data based decision making especially for decisions that are important and complex Instead it emphasizes the importance of applying intuition gut feel spirituality experiential learning and insight as key factors in the executive decision making process Explaining how intuition is a product of past experience

learning and ambient factors the text outlines methods that will help to enhance your data driven decision making process with intuition based decision making The first part of the book the Research Track presents contributions from leading researchers worldwide on the topic of intuition based decision making as applied to management In the second part of the book the Practice Track global executives and senior managers in industry government universities and not for profits present vignettes that illustrate how they have used their intuition in making key decisions The research part of the book helps to frame the problem and address leading research in intuition based decision making The second part then explains how to apply these intuition based concepts and issues in your own decision making process *The Photo Student Handbook* Garin Horner, 2021-08-30

Mattson, 2021-05-21 When personal life splinters from professional life as it does for so many people today we often hold forth a vision of human life in which everything fits together work family community and the common good Organizational leaders love this dream because frankly when people bring their whole selves to work they are more productive What's good for the company in this case looks to be good for the staff member too And that's no small accomplishment in a time when pandemic and racial inequity have made organizational leadership so economically and

socially challenging But all too often this dream of holistic living and work relies too heavily upon the inner resources of individuals The result is burnout as leaders grow fatigued and team members feel manipulated This book s research among social entrepreneurs with close attention to the experience of entrepreneurs of color suggests that workplace communities have the economic and social resources needed for commonwealth But the goods remain latent Instead of obsessing about what individual inwardness can do we should catalyze those latent resources This book shows leaders how to start new conversations and tell new stories in order to cultivate spiritual capital and activate those latent goods
