an Editor's Choice eBook has been in our minds for a while as we wanted to create an environment for the Chief Editors to highlight their choice of representative papers in the Journal we are happy to present now our first edition. The eBook offers a quick though representative window into the different specialties giving additional visibility to some of the most interesting studies published in 2016 and 2017. It provides a glimpse into the state of the art of Earth Science on the cusp of 2020. Earth Science studies the different spheres of the Earth: geosphere, atmosphere, hydrosphere, and partly biosphere, and as such it provides a holistic perspective of our planet. This discipline, in addition to understanding our environment, enables us to face major natural challenges such as improving the management of natural resources, promoting environmental sustainability, and forecasting and managing natural hazards (Acocella 2015 and references therein). On this basis, the contributions grouped in this eBook, even though appearing distinct in subject, methods, goal, and impact, should be considered as different aspects of the same system. Indeed, the selection of these contributions aims to capture a multidisciplinary and common understanding of our planet with its interconnected processes and challenges. It is important to note that in many cases it has not been easy to select a representative study per specialty, and thus the papers included in this eBook should therefore not be considered as the representative ones but rather as a concise selection of key papers. We hope you enjoy reading our first edition of the Editor's Choice eBook. Jessica, Journal Manager and Valerio, Field Chief Editor. **Science Spectrum**, Holt Rinehart & Winston, Holt, Rinehart and Winston Staff, 2003-03.
