Sciences Imran Ahmad Dar, 2012-02-03 The studies of Earth's history and of the physical and chemical properties of the
substances that make up our planet are of great significance to our understanding both of its past and its future The
geological and other environmental processes on Earth and the composition of the planet are of vital importance in locating
and harnessing its resources This book is primarily written for research scholars geologists civil engineers mining engineers
and environmentalists Hopefully the text will be used by students and it will continue to be of value to them throughout their
subsequent professional and research careers This does not mean to infer that the book was written solely or mainly with the
student in mind Indeed from the point of view of the researcher in Earth and Environmental Science it could be argued that
this text contains more detail than he will require in his initial studies or research *Earth Science, Grade 10 Student One*
