Homo Symbolicus

The emergence of symbolic culture, classically identified with the European cave paintings of the Ice Age, is now seen, in the light of recent groundbreaking discoveries, as a complex nonlinear process taking root in a remote past and in different regions of the planet. In this book the archaeologists responsible for some of these new discoveries, flanked by anthropologists interested in primate cognition and cultural transmission, evolutionary psychologists modelling the emergence of metarepresentations, as well as biologists, philosophers, neuro-scientists and an astronomer combine their research findings. Their results call into question our very conception of human nature and animal behaviour, and they create epistemological bridges between disciplines that build the foundations for a novel vision of our lineage's cultural trajectory and the processes that have led to the emergence of human societies as we know them.

The Penultimate Curiosity Roger Wagner, Andrew Briggs, 2016-02-25 When young children first begin to ask why they embark on a journey with no final destination The need to make sense of the world as a whole is an ultimate curiosity that lies at the root of all human religions It has in many cultures shaped and motivated a more down to earth scientific interest in the physical world which could therefore be described as penultimate curiosity These two manifestations of curiosity have a history of connection that goes back deep into the human past Tracing that history all the way from cave painting to quantum physics this book a collaboration between a painter and a physical scientist that uses illustrations throughout the narrative sets out to explain the nature of the long entanglement between religion and science the ultimate and the penultimate

Understanding Cultural Traits Fabrizio Panebianco, Emanuele Serrelli, 2016-02-26 This volume constitutes a first step towards an ever deferred interdisciplinary dialogue on cultural traits It offers a way to enter a representative sample of the intellectual diversity that surrounds this topic and a means to stimulate innovative avenues of research It stimulates critical thinking and awareness in the disciplines that need to conceptualize and study culture cultural traits and cultural diversity Culture is often defined and studied with an emphasis on cultural features For UNESCO culture should be regarded as the set of distinctive spiritual material intellectual and emotional features of society or a social group But the very possibility of assuming the existence of cultural traits is not granted and any serious evaluation of the notion of cultural trait requires the interrogation of several disciplines from cultural anthropology to linguistics from psychology to sociology to musicology and all areas of knowledge on culture This book presents a strong multidisciplinary perspective that can help clarify the problems about cultural traits

Dialogues on the Human Ape Laurent Dubreuil, Sue Savage-Rumbaugh, 2018-12-25 A primatologist and a humanist together explore the meaning of being a human animal Humanness is typically defined by our capacity for language and abstract thinking Yet decades of research led by the primatologist Sue Savage Rumbaugh has shown that chimpanzees and bonobos can acquire human language through signing

and technology Drawing on this research Dialogues of the Human Ape brings Savage Rumbaugh into conversation with the philosopher Laurent Dubreuil to explore the theoretical and practical dimensions of what being a human animal means In their use of dialogue as the primary mode of philosophical and scientific inquiry the authors transcend the rigidity of scientific and humanist discourses offering a powerful model for the dissemination of speculative hypotheses and open ended debates grounded in scientific research Arguing that being human is an epigenetically driven process rather than a fixed characteristic rooted in genetics or culture this book suggests that while humanness may not be possible in every species it can emerge in certain supposedly nonhuman species Moving beyond irrational critiques of ape consciousness that are motivated by arrogant anthropocentric views Dialogues on the Human Ape instead takes seriously the continuities between the ape mind and the human mind addressing why language matters to consciousness free will and the formation of the human animal self
