Homosexuality And Manliness In Postwar Japan Routledge Contemporary Japan Series:

Homosexuality and Manliness in Postwar Japan Jonathan D. Mackintosh, 2009-10-16 This book examines the history of the relationship between male homosexuality and conceptions of manliness in postwar Japan. It provides a detailed account of the formative years of the homo magazine genre in the 1970s and explores its evolution in subsequent years, analyzing key issues including homophobia, gay liberation, male-male sex, love and friendship, the masculine body, and manly identity.

Homosexuality and Manliness in Postwar Japan Jonathan D. Mackintosh, 2010 Japan's first professionally produced, commercially marketed, and nationally distributed gay lifestyle magazine, *Barazoku* (The Rose Tribes), was launched in 1971. Publicly declaring the beauty and normality of homosexual desire, *Barazoku* electrified the male homosexual world whilst scandalising mainstream society and sparked a vibrant period of activity that saw the establishment of an enduring Japanese media form, the homo magazine. Using a detailed account of the formative years of the homo magazine genre in the 1970s as the basis for a wider history of men, this book examines the relationship between male homosexuality and conceptions of manliness in postwar Japan. The book charts the development of notions of masculinity and homosexual identity across the postwar period, analysing key issues including public/private homosexualities, inter-racial desire, male-male sex, love and friendship, the masculine body, and manly identity. The book investigates the phenomenon of manly homosexuality, little treated in both masculinity and gay studies on Japan, arguing that desires and individual narratives were constructed within and not necessarily outside of the dominant narratives of the nation, manliness, and Japanese culture. Overall, this book offers a wide-ranging appraisal of homosexuality and manliness in postwar Japan that provokes insights into conceptions of Japanese masculinity in general.

Homosexuality and Manliness in Japan Jonathan D. Mackintosh, 2011 This study examines the history of the relationship between male homosexuality and conceptions of manliness in postwar Japan. It provides a detailed account of the formative years of the homo magazine genre in the 1970s and explores its evolution in subsequent years, analyzing key issues.

Akira Kurosawa and Modern Japan David A. Conrad, 2022-05-06 The samurai films of legendary Japanese director Akira Kurosawa are set in the past but they tell us much about the present as do his crime stories, romances, military films, medical dramas, and art films. His movies are beloved for their timeless protagonists and haunting vistas of old Japan, but we haven't yet fully grasped everything they can teach us about modern Japan. Kurosawa's films evolved as Japan redefined and reinvented itself from movies made for the wartime regime to those made amid the trials of American occupation. From the lavish epics of the economic miracle years to searching masterpieces made with international assistance in a globalizing world, Kurosawa's movies responded to changing times. This detailed study of all 30 of Kurosawa's films analyzes the links between the thrilling narratives onscreen and the equally remarkable events that occurred in Japan over his long productive career. This book explores how Kurosawa's classics depict the political, economic, cultural, sexual, and environmental upheavals of a nation at the center of a turbulent century, both directly and through period-piece mythmaking.

negotiate new gender roles and cultural assumptions about women whilst reorganizing the Japanese workplace and wider socio economic relationships Further the book explores how professional women create new social identities through the mutual conditioning of structure and self and asks how women come to understand their experiences how their actions change the gendering of the workforce and how their lives shape the economic political social and cultural landscapes of this post industrial nation Based on extensive fieldwork *Career Women in Contemporary Japan* will have broad appeal across a range of disciplines including Japanese culture and society gender and family studies women s studies anthropology ethnology and sociology

Negotiating Censorship in Modern Japan Rachael Hutchinson, 2013-08-21 Censorship in Japan has seen many changes over the last 150 years and each successive system of rule has possessed its own censorship laws regulations and methods of enforcement Yet what has remained constant through these many upheavals has been the process of negotiation between censor and artist that can be seen across the cultural media of modern society By exploring censorship in a number of different Japanese art forms from popular music and kabuki performance through to fiction poetry and film across a range of historical periods this book provides a striking picture of the pervasiveness and strength of Japanese censorship across a range of media the similar tactics used by artists of different media to negotiate censorship boundaries and how censors from different systems and time periods face many of the same problems and questions in their work The essays in this collection highlight the complexities of the censorship process by investigating the responsibilities and choices of all four groups artists censors audience and ideologues in a wide range of case studies The contributors shift the focus away from top down suppression towards the more complex negotiations involved in the many stages of an artistic work all of which involve movement within boundaries as well as testing of those boundaries on the part of both artist and censor Taken together the essays in this book demonstrate that censorship at every stage involves an act of human judgment in a context determined by political economic

and ideological factors This book and its case studies provide a fascinating insight into the dynamics of censorship and how these operate on both people and texts As such it will be of great interest to students and scholars interested in Japanese studies Japanese culture society and history and media studies more generally

Oriental Interiors John Potvin, 2015-12-17 Since the publication of Edward Said's groundbreaking work Orientalism 35 years ago numerous studies have explored the West's fraught and enduring fascination with the so called Orient Focusing their critical attention on the literary and pictorial arts these studies have to date largely neglected the world of interior design Oriental Interiors is the first book to fully explore the formation and perception of eastern inspired interiors from an orientalist perspective Orientalist spaces in the West have taken numerous forms since the 18th century to

the present day and the fifteen chapters in this collection reflect that diversity dealing with subjects as varied and engaging as harems Turkish baths on RMS Titanic Parisian bachelor quarters potted palms and contemporary yoga studios It explores how furnishings surface treatments ornament and music for example are deployed to enhance the exoticism and pleasures of oriental spaces looking across a range of international locations Organized into three parts each introduced by the editor the essays are grouped by theme to highlight critical paths into the intersections between orientalist studies spatial theory design studies visual culture and gender studies making this essential reading for students and researchers alike *Sound, Space and Sociality in Modern Japan* Joseph D. Hankins, Carolyn Stevens, 2013-12-04 This book argues that sound as it is created transmitted and perceived plays a key role in the constitution of space and community in contemporary Japan The book examines how sonic practices reflect politics aesthetics and ethics with transformative effects on human relations From right wing sound trucks to left wing protests from early 20th century jazz cafes to contemporary avant garde art forms from the sounds of U S military presence to exuberant performances organized in opposition the book rich in ethnographic detail contributes to sensory anthropology and the anthropology of contemporary Japan Postwar History Education in Japan and the Germanys Julian Beatus Dierkes, 2010 How did East and West Germany and Japan reconstitute national identity after World War II Did all three experience parallel reactions to national trauma and reconstruction History education shaped how these nations reconceived their national identities Because the content of history education was controlled by different actors history education materials framed national identity in very different ways In Japan where the curriculum was controlled by bureaucrats bent on maintaining their purported neutrality materials focused on the empirical building blocks of history wh

Postwar History Education in Japan and the Germanys Julian Dierkes, 2010-12-14 How did East and West Germany and Japan reconstitute national identity after World War II Did all three experience parallel reactions to national trauma and reconstruction History education shaped how these nations reconceived their national identities Because the content of history education was controlled by different actors history education materials framed national identity in very different ways In Japan where the curriculum was controlled by bureaucrats bent on maintaining their purported neutrality materials focused on the empirical building blocks of history who where what at the expense of discussions of historical responsibility In East Germany where party cadres controlled the curriculum students were taught that World War II was a capitalist aberration In West Germany where teachers controlled the curriculum students were taught the lessons of shame and then regeneration after historians turned away from grand national narratives This book shows that constructions of national identity are not easily malleable on the basis of moral and political concerns only but that they are subject to institutional constraints and opportunities In an age when post conflict reconstruction and reconciliation has become a major focus of international policies the analysis offers important implications for the parallel revision of portrayals of national history and the institutional reconstruction of policy making regimes *Japan's Foreign Aid to Africa* Pedro Amakasu

Raposo,2013-09-05 The Tokyo International Conference on African Development TICAD was established in 1993 with the intention of creating opportunities for trade and investment on both sides and the promotion of sustainable development In 2003 the conference translated Japanese aid policy to Africa into three key pillars human centered development poverty reduction through economic growth and the consolidation of peace and since 2005 Africa has on several occasions been the largest recipient of Japanese overseas aid Tracing Japanese foreign aid to Africa during and after the Cold War this book examines how the TICAD process sits at the intersection of international relations and domestic decision making Indeed it questions whether the increase in aid has been driven by domestic changes such as demands from civil society and donor interest or pressures emanating from the international system Taking Angola and Mozambique as case studies the book explores how Japan s development cooperation with Africa has assisted previously war torn states make the transition from war to peace and in doing so demonstrates the centrality of human security to Japanese foreign policy as a means of ensuring sustainable development This book will have great interdisciplinary appeal to students and scholars of Japanese and African studies Japanese politics international relations theory foreign policy economic development and sustainable development
