Historical Genesis Richard James Fischer,2008-01-28 The beginning chapters of Genesis come alive with characters places and events almost totally unknown outside of the Bible itself except when illuminated by the fascinating history of the ancient Near East Did a man we call Adam actually exist Was someone known to us as Noah warned of a cataclysmic flood and instructed to build an ark Could the Tower of Babel incident actually have happened When archaeological artifacts and literature began to surface from ancient Mesopotamia present day Iraq nearly 200 years ago only a handful of archaeologists dared to point out that there appeared to be a close relationship between Genesis and the ruminations of the Sumerians and Akkadians who once lived there Often enduring great personal hardships these archaeological pioneers produced copious translations and marvelous insights Cuneiform texts compiled from almost two centuries of exploration have added significantly to our understanding of the historical underpinnings of the Old Testament The reader will gain a new appreciation for the historical integrity of Genesis 2 11 and marvel at the evidence that the persons places and events depicted though long misunderstood could be real Please visit Richard J Fisher s web site at <http://www.historicalgenesis.com>

New Evidence for Two Human Origins Gary T. Mayer,2007-01-29 The subject of human origins is a topic that not only feeds our curiosity it also offers to be a topic that can bring us greater meaning to our lives It has been assumed by many scientists and biblical scholars that the

human race emerged from a single nucleus Could this have been a wrong assumption New evidence has come to light indicating that Adam and Eves descendants married into an existing race Where did this existing race come from When and where did these two races merge This book provides a thesis which answers all these questions and in so doing harmonizes the teaching of the Bible and the true teachings of science

Snakes, People, and Spirits, Volume One Robert Hazel, 2019-11-05 This two volume publication offers an in depth analysis of ophidian symbolism in Eastern Africa while setting the topic within its regional and historical context namely with regards to the rest of Africa ancient Egypt and Mesopotamia the Greek world ancient Palestine Arabia India and medieval and pre Christian Europe Through the ages most of those areas have connected with Eastern Africa in a broad sense where ophidian symbolism was as rampant and far reaching if not more so as anywhere else on the continent and perhaps in past civilisations Much as in the wider context snakes were held to be long lived closely related to holes caverns trees and water life and death and credited with a liking for milk Even though ophidian symbolism has always been developed out of the outstanding biological and ethological features of snakes the process of symbolisation which plays a crucial role in the elaboration of cultural systems and the shaping of human experience was inevitably at work This first volume deals with snakes as a zoological category snake symbolism as perceived by encyclopaedists and psychologists and ophidian symbolism as it occurred in

ancient civilisations It explores the traditional African scene in general with a view to set the scene for a more proximate baseline for comparison The divide between animals and humans was porous and snakes had a more or less equal footing in both the animal realm and the spiritual world Key features of snake symbolism in traditional Eastern Africa are then examined in detail especially phantasmagorical snakes the rainbow serpent snake totems and snake related witches and ritual leaders among others In Eastern Africa the meanings attributed to snakes were multifaceted and paradoxical Overall the two volumes of this publication show that African snake symbolism broadly echoed the diverse representations of ancient civilisations The widely acknowledged assimilation of snakes to death and Evil is therefore unrepresentative both historically and culturally

Defending Sin Hans Madueme, 2024-05-28 The conflict between the natural sciences and Christian theology has been going on for centuries Recent advances in the fields of evolutionary biology behavioral genetics and neuroscience have intensified this conflict particularly in relation to origins the fall and sin These debates are crucial to our understanding of human sinfulness and necessarily involve the doctrine of salvation Theistic evolutionists have labored hard to resolve these tensions between science and faith but Hans Madueme argues that the majority of their proposals do injustice both to biblical teaching and to long standing doctrines held by the mainstream Christian tradition In this major contribution to the field of science and religion Madueme demonstrates that the classical notion of sin reflected in Scripture the creeds and tradition offers the most compelling and theologically coherent account of the human condition He answers pressing challenges from the physical sciences on both methodological and substantive levels Scholars pastors students and interested lay readers will profit from interacting with the arguments presented here

Can We Believe Genesis in an Age of Science? Mark Glaab, 2023-02-10 According to many Christian leaders early Genesis is a myth or allegory Therefore Adam and Eve never lived Eve was never tempted and Adam never sinned There was no creation week so God did not make the earth the stars the birds fish or the animals This has become the default position of many Christian teachers ministries and campuses This is not just mainline churches but evangelicals have joined the ranks of doubters in creation This is a reaction to the claims of Christians who work in the sciences claiming that evolution is now an established fact As a result creation week is put in the category of myth or allegory not history New interpretations of Genesis abound There is just one problem This may be how people
