Simple How-to guides to maintaining your home

Windows: How to Fix a Stuck Window

Windows are an important part of your home, and they can be a pain to maintain. If you have a window that is stuck, it can be frustrating to try to open or close it. There are several reasons why a window might be stuck, and there are several ways to fix it. In this article, we will discuss the most common causes of stuck windows and how to fix them.

The most common cause of a stuck window is a problem with the weatherstripping. Weatherstripping is the material that seals the window against the frame. If the weatherstripping is worn or damaged, it can prevent the window from closing properly. To fix this, you can remove the old weatherstripping and replace it with new weatherstripping. You can find weatherstripping at most hardware stores.

Another common cause of a stuck window is a problem with the balance. The balance is the system that allows the window to move up and down. If the balance is out of adjustment, it can prevent the window from opening or closing properly. To fix this, you can adjust the balance by turning the screws on the side of the window frame. You can find instructions for adjusting the balance in the owner's manual for your window.

If you have tried these fixes and your window is still stuck, you may need to call a professional. A professional can diagnose the problem and make the necessary repairs. It is important to get a stuck window fixed as soon as possible, as it can lead to water damage or other problems if left alone.
