Handbook on Japanese Military Forces: with a New Introduction by David Isby and Afterword by Jeffrey Ethell ,1991 **Handbook on Japanese Forces 1944** WAR DEPARTMENT.,2020-10-13 A Restricted publication containing details of the Japanese military system organisation of the field forces their tactics fortification supply evacuation arrangements weapons equipment uniforms insignia and individual equipment

The Japanese Army Handbook 1939-1945 George Forty,2002-12-16 This is an insight into the most feared army of World War II The Japanese Imperial Army grew from 1 5 million men in 1939 to 5 5 million men by the end of the war Their highly successful campaigns in the Far East and the Pacific at the beginning of World War II were every bit as spectacular as those of the Germans in Europe and they earned an enviable reputation as expert jungle fighters which it took some years for the Allies to match Their code of honour also made them extremely cruel enemies to prisoners and civilians alike while their Kamikaze suicidal tendencies meant they would automatically fight to the last without any thought of surrender Fully illustrated with rare archive photographs this is a comprehensive study of the army The author describes how they mobilized and trained their soldiers and looks at their organizational structures from high command down to divisional level and below Also included are uniforms equipment all kinds of weapons ranging from tanks and artillery technical equipment tactics symbology and vehicle markings

The Development of Mine Warfare Norman E. Youngblood,2006-06-30 In 1997 the International Campaign to Ban Landmines ICBL coordinated the Convention on the Prohibition of the Use Stockpiling Production and Transfer of Anti Personnel Mines and on their Destruction As of mid 2005 145 states had signed the agreement The ICBL s efforts were in large part a response to the careless use of landmines in the previous fifty years The history of mine use in warfare however goes back much further than the World Wars of the 20th century and includes both land and sea use This first comprehensive study traces the technical tactical and ethical developments of mine warfare from ancient times to the present Beginning with mine warfare s roots in ancient Assyria and China Youngblood takes the reader through the centuries of debate about how these hidden weapons should be used A look at 19th century developments explores the intertwined development of land and sea mines and the inventors behind them including Robert Fulton Samuel Colt and Immanuel Nobel father of Alfred Nobel Subsequent chapters examine the use of mines in the American Civil War the Russo Japanese War both World Wars and the battlefields of the Cold War and chart key

battles and technical innovations such as the development of air delivered munitions Finally the author addresses the ethical concerns raised by the careless mining namely the impact on civilians and the difficulties of de mining and the treaties that regulate landmine use
