### **Lily Pond Four Years With A Family Of Beavers:**

**Lily Pond** Hope Ryden,1990-10 Award winning nature writer Hope Ryden brings readers not only a scientific look at animal behaviors but also a warm and engaging story of the adventures and family life of the beaver **Lily Pond** Hope Ryden,1989 A dramatic account of the ways of beavers by a noted naturalist **Made From This Earth** Vera Norwood,2014-07-01 The broad sweep of environmental and ecological history has until now been written and understood in predominantly male terms In **Made From This Earth** Vera Norwood explores the relationship of women to the natural environment through the work of writers illustrators landscape and garden designers ornithologists botanists biologists and conservationists Norwood begins by showing that the study and promotion of botany was an activity deemed appropriate for women in the early 1800s After highlighting the work of nineteenth century scientific illustrators and garden designers she focuses on nature s advocates such as Rachel Carson and Dian Fossey who differed strongly with men on both women s nature and the value of the natural world These women challenged the dominant male controlled ideologies often framing their critique with reference to values arising from the female experience Norwood concludes with an analysis of the utopian solutions posed by ecofeminists the most recent group of women to contest men over the meaning and value of nature

**Why We Love** Helen Fisher,2005-01-02 A groundbreaking exploration of our most complex and mysterious emotion Elation mood swings sleeplessness and obsession these are the tell tale signs of someone in the throes of romantic passion In this revealing new book renowned anthropologist Helen Fisher explains why this experience which cuts across time geography and gender is a force as powerful as the need for food or sleep **Why We Love** begins by presenting the results of a scientific study in which Fisher scanned the brains of people who had just fallen madly in love She proves at last what researchers had only suspected when you fall in love primordial areas of the brain light up with increased blood flow creating romantic passion Fisher uses this new research to show exactly what you experience when you fall in love why you choose one person rather than another and how romantic love affects your sex drive and your feelings of attachment to a partner She argues that all animals feel romantic attraction that love at first sight comes out of nature and that human romance evolved for crucial reasons of survival Lastly she offers concrete suggestions on how to control this ancient passion and she optimistically explores the future of romantic love in our chaotic modern world Provocative enlightening and persuasive **Why We Love** offers radical new answers to the age old question of what love is and thus provides invaluable new insights into keeping love alive **The Emperor's Embrace** Jeffrey Masson,2001-02-28 Jeffrey Moussaieff Masson s marvelous Jane Goodall New York Times bestseller *When Elephants Weep* made us re evaluate the emotional lives of animals And in his follow up New York Times bestseller *Dogs Never Lie About Love* Masson reflected with intelligence and originality Los Angeles Times Sunday Book Review on the emotional world of dogs Now in *The Emperor's Embrace* Masson offers a remarkable look at one of the most fulfilling roles in the animal world fatherhood With fascinating insight impeccable

research and captivating writing controversial psychoanalyst Jeffrey Masson a new father himself introduces us to the world's best dads He takes us to such places as Antarctica as he explores how emperor penguin fathers incubate the eggs of their young by carrying them around on their feet for two months nestled beneath a special brood pouch And he tells us how once the babies hatch the fathers snuggle the babies on their feet until the mother returns from her time at sea feeding them a special milk like substance until her arrival Masson a superb storyteller showcases the extraordinary behavior of outstanding fathers heroes among animals including the wolf and why wolves make good fathers and dogs don't the beaver who encourages his young to cling to his tail as he navigates through ponds the sea horse the only male animal that gives birth to its young the marmoset the South American monkey who carries his babies for the first two years of their lives wherever he goes Masson also examines nature's worst fathers lions langurs bears and humans He shows that when a father does care for his young as with the beaver we immediately look for a biological and not an emotional explanation But Masson demonstrates that for these animals as with humans fatherhood is a profound all encompassing experience Groundbreaking compelling inspirational Masson's unique look at one of nature's most venerable institutions takes us to animal habitats around the world yet always returns to the heart For animal lovers fathers mothers sons and daughters everywhere The Emperor's Embrace is a book that will forever change our perceptions of parenthood and family love

**Learning from Wolves** Sara Hines Martin, 2012-09-24 Did you know that nature teaches us many surprising lessons about how to live our lives more effectively Discover some of those in this book that will also inspire you to be good stewards of the earth

*Ecological Consequences of Artificial Night Lighting* Catherine Rich, Travis Longcore, 2013-04-16 While certain ecological problems associated with artificial night lighting are widely known for instance the disorientation of sea turtle hatchlings by beachfront lighting the vast range of influences on all types of animals and plants is only beginning to be recognized From nest choice and breeding success of birds to behavioral and physiological changes in salamanders many organisms are seriously affected by human alterations in natural patterns of light and dark *Ecological Consequences of Artificial Night Lighting* is the first book to consider the environmental effects of the intentional illumination of the night It brings together leading scientists from around the world to review the state of knowledge on the subject and to describe specific effects that have been observed across a full range of taxonomic groups including mammals birds reptiles and amphibians fishes invertebrates and plants *Ecological Consequences of Artificial Night Lighting* provides a scientific basis to begin addressing the challenge of conserving the nighttime environment It cogently demonstrates the vital importance of this until now neglected topic and is an essential new work for conservation planners researchers and anyone concerned with human impacts on the natural world

,1989 Adult books are categorized by genre i e fiction mystery science fiction nonfiction Along with bibliographic information the expected date of publication and the names of literary agents for individual titles are provided Starred reviews serve several functions In the adult section they mark potential bestsellers major promotions book club selections and just very good books in the children s section they denote books of very high quality The unsigned reviews manage to be discerning and sometimes quite critical      **Beavers** Frances Backhouse,2021-05-11 By cutting trees and building dams beavers shape landscapes and provide valuable wetland homes for many plants and animals These radical rodents were once almost hunted to extinction for their prized fur but today we are building a new relationship with them and our appreciation of the benefits they offer as habitat creators and water stewards is growing Packed with facts and personal stories this book looks at the beaver s biology and behavior and illuminates its vital role as a keystone species The beaver s comeback is one of North America s greatest conservation success stories and *Beavers Radical Rodents and Ecosystem Engineers* introduces readers to the conservationists scientists and young people who are working to build a better future for our furry friends The epub edition of this title is fully accessible      *Exuberance* Kay Redfield Jamison,2005-09-13 A national bestselling author examines one of the mind s most exalted states one that is crucially important to learning risk taking social cohesiveness and survival itself Jamison is that rare writer who can offer a kind of unified field theory of science and art The Washington Post Book World With the same grace and breadth of learning she brought to her studies of the mind s pathologies Kay Redfield Jamison examines one of its most exalted states exuberance This abounding ebullient effervescent emotion manifests itself everywhere from child s play to scientific breakthrough *Exuberance The Passion for Life* introduces us to such notably irrepressible types as Teddy Roosevelt John Muir and Richard Feynman as well as Peter Pan dancing porcupines and Charles Schulz s Snoopy It explores whether exuberance can be inherited parses its neurochemical grammar and documents the methods people have used to stimulate it The resulting book is an irresistible fusion of science and soul      *Zoopolis* Sue Donaldson,Will Kymlicka,2011-11-24 *Zoopolis* offers a new agenda for the theory and practice of animal rights Most animal rights theory focuses on the intrinsic capacities or interests of animals and the moral status and moral rights that these intrinsic characteristics give rise to *Zoopolis* shifts the debate from the realm of moral theory and applied ethics to the realm of political theory focusing on the relational obligations that arise from the varied ways that animals relate to human societies and institutions Building on recent developments in the political theory of group differentiated citizenship *Zoopolis* introduces us to the genuine political animal It argues that different types of animals stand in different relationships to human political communities Domesticated animals should be seen as full members of human animal mixed communities participating in the cooperative project of shared citizenship Wilderness animals by contrast form their own sovereign communities entitled to protection against colonization invasion domination and other threats to self determination Liminal

animals who are wild but live in the midst of human settlement such as crows or raccoons should be seen as denizens resident of our societies but not fully included in rights and responsibilities of citizenship To all of these animals we owe respect for their basic inviolable rights But we inevitably and appropriately have very different relations with them with different types of obligations Humans and animals are inextricably bound in a complex web of relationships and Zoopolis offers an original and profoundly affirmative vision of how to ground this complex web of relations on principles of justice and compassion
