Linde Hydraulic Control (LHC)

Digital electro-hydraulic controller

Instead of a control unit, an integrated module has taken the place of the control technology. Instead of a hydraulic controller, a computer electronic controller is used, which provides a wide range of functions for the drive unit and the working hydraulics (2).

Adaptation to various trucks

The electronic control unit is capable of controlling hydraulic flow in a variety of ways and with different drive inputs. To use different truck parameters and sensors, each truck model has a control unit that is adapted to the truck.

Troubleshooting

The processor of the electronic control unit analyzes analog and digital signals. The processor recognizes hydraulic malfunctions and system errors, and displays an error message on the display/monitor on the control interface. In addition, the control unit activates a variety of functions according to the error's highest priority.

- Working light flashes
- Activation of the manual emergency stop
- The truck brakes with automatic emergency stop and all hydraulic valves
- The main battery (in the emergency function) the manual emergency stop activates off
- An error code appears on the display

These functions can be activated by switching off the emergency stop and the stop button. During a fault, the control unit shows whether the error is still present. If the error is no longer present, the truck returns to normal operation. If the error persists, the error code appears on the display and one of the measures listed above is carried out.

Changing the controller

4.1.1.1.1.1

Problems regarding component damage due to electronic discharge. Component damage is resulting elements will occur if the controller is removed.

The controller is equipped with a "fuses plug" which is attached to the back of each fuse holder. Communication lines pass via this plug. The upper plug holder and the software version of the controller can be read out via the fuse holder.

4.1.1.1.1.2

If the controller is replaced, the previous spare part controller must be identified and plug adapted to the cable harness. All necessary information is available on the code Europe.
