Cultural Rights in International Law Elsa Stamatopoulou, 2007 Drawing from a comprehensive review of legal instruments practice jurisprudence and literature and using a multidisciplinary approach this unique book brings forth the full spectrum of cultural rights as individual and

collective human rights and offers a compelling vision for public policy Introduction to Applied Linguistics Alan Davies, 2007-07-12 This second edition of the foundational textbook *An Introduction to Applied Linguistics* provides a state of the art account of contemporary applied linguistics The kinds of language problems of interest to applied linguists are discussed and a distinction drawn between the different research approach taken by theoretical linguists and by applied linguists to what seem to be the same problems Professor Davies describes a variety of projects which illustrate the interests of the field and highlight the marriage it offers between practical experience and theoretical understanding The increasing emphasis of applied linguistics on ethicality is linked to the growth of professionalism and to the concern for accountability manifested in the widening emphasis on critical stances This Davies argues is at its most acute in the tension between giving advice as the outcome of research and taking political action in order to change a situation which it is claimed needs ameliorisation This dilemma is not confined to applied linguistics and may now be endemic in the applied disciplines **The Sociopolitics of English Language Teaching** Joan Kelly Hall, William Egginton, 2000-01-01 The sociopolitical dimensions of English language teaching are central to the English language professional These dimensions include language policies cultural expectations and the societal roles of languages This book aims to present these issues to practicing and aspiring teachers in order to raise awareness of the sociopolitical nature of English language teaching *Who's Afraid of Multilingual Education?* Amir Kalan, 2016-08-18 More than 70 languages are spoken in contemporary Iran yet all governmental correspondence and educational textbooks must be written in Farsi To date the Iranian mother tongue debate has remained far from the international scholarly exchanges of ideas about multilingual education This book bridges that gap using interviews with four prominent academic experts in linguistic human rights mother tongue education and bilingual and multilingual education The author examines the arguments for rejecting multilingual education in Iran and the four interviewees counter those arguments with evidence that mother tongue based education has resulted in positive outcomes for the speakers of non dominant language groups and the country itself It is hoped that this book will engage an international audience with the debate in Iran and show how multilingual education could benefit the country **Human Rights** Albert A. Zinnos, 2007 Human rights refers to the concept of human beings as having universal rights or status regardless of legal jurisdiction and likewise other localising factors such as ethnicity and nationality For many the concept of human rights is based in religious principles However because a formal concept of human rights has not been universally accepted the term has some degree of variance between its use in different local jurisdictions difference in both meaningful substance as well as in protocols for and styles of application Ultimately the most general meaning of the term is one which can only apply universally and hence the term human rights is often itself an appeal to such transcended principles without basing such on existing legal concepts The term humanism refers to the developing doctrine of such universally applicable values and it is on the basic concept that human beings have innate rights that more specific local legal concepts are often

based Within particular societies human rights refers to standards of behaviour as accepted within their respective legal systems regarding 1 the well being of individuals 2 the freedom and autonomy of individuals and 3 the representation of the human interest in government These rights commonly include the right to life the right to an adequate standard of living the prohibition of genocide freedom from torture and other mistreatment freedom of expression freedom of movement the right to self determination the right to education and the right to participation in cultural and political life These norms are based on the legal and political traditions of United Nations member states and are incorporated into international human rights instruments This new book brings together the latest book literature centred on this crucial topic **Theories and**

Language Rights Revisited - The Challenge of Global Migration and Communication Dagmar Richter,Ingo Richter,R. Toivanen,I. Ulasiuk,2012-01-01 Hauptbeschreibung Linguistic autonomy assured internationally to ethnic minorities has succeeded above all in Europe yet is nowhere near passing its acid test in other parts of the world Examples show that it is not only a question of linguistic autonomy but of ethnic and religious conflicts which are simmering in the foreground Hence there are reasons for doubting whether international agreements designed to guarantee linguistic autonomy can solve these conflicts The protection of indigenous languages is justified largely by the principle of diversity and is de **International Journal of the Sociology of Language** ,1996 **Regional Nationalism in Spain** Jaine
