Rescue of Business in Europe Bob Wessels, Stephan Madaus, European Law Institute, 2020-01-30 This edited volume is based on the European Law Institute's project The Rescue of Business in Insolvency Law which ran from 2013 to 2016 The project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses Although the focus was primarily on the design and implementation of formal procedures that is those provided by law the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter The ELI project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business an auction procedure in which the business is sold on a going concern basis to a new owner is one obvious alternative The ELI project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal

devastating financial events of that year In the process bank business has been laid open to intense public and government scrutiny and regulation of banking has grown to spectacular proportions Prominent among the measures taken is the EU Bank Recovery and Resolution Directive BRRD which together with the Single Resolution Mechanism SRM and the Single Resolution Fund constitutes a crucial new pillar in the European Banking Union Practitioners searching for orientation in what can readily be perceived as a jungle have an urgent need for a clear and systematic description and analysis of these new rules which are sure to have a massive impact on bank business from this time on not only in Europe but also wherever European business is to be found The solidly grounded analysis in this important book sets the new rules under BRRD into their full context as cross border phenomena With its crystal clear explanation of key provisions procedures and triggers the book organises a highly complex legal system into patterns and action plans that can be applied in virtually any eventuality likely to arise in cases where bank business is of central significance Among the topics covered are the following entities covered by BRRD exceptions under BRRD objective and scope of BRRD tools bail in bridge bank sale of business asset separation asset quality reviews curing or mitigating the continuing problem of non performing loans new rules as response to lack of private solutions banks requirement to provide a minimum amount of eligible liabilities safety buffers to protect resolution need to be resolvable in a worst case leverage and liquidity ratios forced mergers market spillover effects of recovery planning group recovery planning effects of foreign law contracts and assets write down of capital instruments and special problems of cross border restructuring The presentation is enhanced by a comparative dimension which includes reference to United States and other national developments and a full scale analysis of Switzerland s regulatory response to the crisis Given that a full seamless global system of bank recovery and resolution has not yet been found and that major banks are global players headquartered in different jurisdictions and even different continents this book will greatly assist in the work of practitioners who must deal with cases involving international banking under the prevailing status quo Its usefulness to officials and academics in international banking and finance law and policy who are working towards a global solution is of incalculable value ["Code of Massachusetts regulations, 2014"](#) ,2014 Archival snapshot of entire looseleaf
